President and Board of Trustees
206 S. Hough Street
Barrington, Illinois

Gentlemen:

You may recall our recent letter in which we offered our services to you in connection with your Fire and Police Station Building Program. It occurred to us that you, undoubtedly, would be interested in having a survey made, first, to determine the actual scope of such a program, and second, to be sure that your project when completed would satisfy your requirements for some years to come.

Our office is regularly engaged in the design of work of this kind and we believe we are in unique position to be of assistance to you in the preparation of studies and a report relating to your Fire and Police Department needs.

We are available at your convenience to discuss any phase of your program with you without obligation on your part, of course.

Respectfully yours,

CONSOER AND MORGAN

Harry S. Morgan
