A Possible Octome of the War.
There has been much speculation as
to the chances of a world strength
growing out of the present content in
the far wast, but very little relative to
the far wast, but very little relative to
the far wast, but ready to the relative
the far wast, but ready contributes
the far wast, but ready contributes
the contribute of the far and M. de
the footness of the clar, and M. Pichre, the minister of the inte with the fatuous shortsightedness marks the despot, is adopting a arch and oppressive measures to quel-be mutterings of the people. The war-ith Japan is not popular in Russia, is regarded as a contest brought on the diplomast, Admiral Alexeled-ing held chiefly responsible. With few more reverses to the Russian ns this smoldering fre of discontent y be expected to burst into flame. a revolutionary sentiment, that was be misnamed minimum, has never d out, though temporarily refraining public expression because of the ally repressive measures adopted the government. The resentment by the Poles and Pinns is still as reft by the Foles and Finns is still as bitter as of old, and the numerous other races foreithy brought under the Rus-sian yoke have not forgiven their con-querors. The colleges for the most part are bottleds of liberal sentiment, the nobles are restless, and the people are only held in subjection by their are only held in subjection by their are only held in subjection by their order, coupled with the established order, coupled with the statistical order, coupled with the statistic order, order to be the statistic order of a statistic part of a rapidag better. But let the spirit of revoit once break out and there would be recruited from every side trans-

great defeat that would discredit oversument and show its weakness of furnish the opportunity for b the opponents of absolutions waited so long. Then the drag-teeth of oppression that Russia waited so long. Then the drag-teeth of oppression that Russia sown throughout all her provinces d spring up into a crop of armed The Siberian exiles, the slaugh-i Poles, the downtrodden Finns dom noves on, though it be over wreck of an autocracy. The God reigned at the fall of Babylon

a freer and better Russia could e in place of the present despotism, war in the far east would not have

been in value.

The Matter of Waste.

Any manufacturer knows that mos
of the profits now made by hig covcerns have come through the elimination of waste. In the glant precking
houses every scrap is utilized for some
phrpose. One of the industrial pulpose
lema that confront this civilization is

lems that confront this civilization is bow to prevent or utilize examine waste. The same principle that has been applied to private business must finally apply to sorlety as no whole. No effort must go servey, no faise motions aboud the permitted, no waste must be allowed. All must be conserved, just as it is in nature. In the principle in its con-limitation of the principle in its content on the ratio of the principle in the material or the principle in its con-tent on the ratio number of the principle in the material or the principle in the con-tent on the ratio number of the principle in the

p machinery—and yos have converted him.

A considerable portion of human effort at present goes up in smoke. The problem of twentieth century civilization is how to conserve the waste.

Since its own to conserve one many.

Very many plans have been supported. From time to time to drine to drine to the manderror at the marsh lands between the control of the process of the control of the process of the control of the process of

Charles M. Schwab announces that be will devote the rest of his life to study. This will be a distinct advan-tage to both Mr. Schwab and the pub-lic. He needs the study, and the pub-lic needs its money.

The fact that the first three letters in the names of Kuroki and Kuropatkin are the same suggests that when Kur meets Kur there is liable to be a very resting dog fight

There is one thing can be said in be baif of the spring chicken. It is never so old as the jokes spring concern-ing it.

In the See heryest Agains.

The positions of "Why does a hear" and "What is a door" were fault.

The questions of "Why does a hear" and "And it has been served to be seen served. As the government of the seen served. As the government of the seen served to the restriction of the market sightness against the served of the following the served of the served of the seen served to the seen served to

50 Years of Success

Wheeler & Wilson No. 9 Sewing Machine No. 9

The Rotary Hook dispires the old, out of date, numerchanical and trouble-some shuttle.

The Prictionless ball bearings and perfect mechanical construction enable it to be operated with one third less excition than is equired by officiary markings, it seems three yards of goods while a shuttle machine sees time.
