

UNCLE SAM'S WONDERS

THE GREAT EXHIBITION OF THE WORLD'S FAIR.

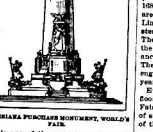

All Executive Departments Send Treasures to the World's Fair.

Display installed in the Largest Government Exhibition Building Ever Constructed - Previous Displays of the same character at the State and National Working Fairs.

The United States Government building at the World's Fair occupies an elevated site at the most magnificent picture of the Exposition. The great building is the Government building in the Fair from the very center of the Fair, looking across the picturesque water garden that lies between the Palace of Mines and Metallurgy and Liberal Arts.

The hill slope in front of the Government building is covered with a broad walkway leading to the exhibition building. The building is 800 feet long by 250 feet wide. The largest structure ever provided at an exposition by the Federal Government. It is distinguished from all the other buildings by the fact that it is the only building supported by steel trusses, the roof being supported by steel struts, forming a splendid display of architecture.

In this building are installed the exhibits of the executive departments of the government. The building is a museum of all the treasures of the United States. It is the heart of every patriotic American. The exhibits are to be seen here, and the autographs of the men of the past are on display. The exhibits of the executive departments of the government. DOUGLASS PHOTODUPLICATION, WASHINGTON, D. C.

But so one of the most important mail cars, in which are placed the exhibits of the various departments, are actively engaged in "throwing" the exhibits to you. You will see the postal clerks at work on the platform, speeding along a railroad track.

A carriage collection of old time relics from the postoffice museum at Washington illustrates on no special description can do the crude beginnings of the postal service. One of these relics is an old fashioned stage coach that once carried United States mail through a portion of the Louisiana purchase territory. President Roosevelt, who once inspected it, is seated with a rough rider's interest in the bullet holes which stage robbers and mountain brigands aimed through its stiff leather cushions. General Sherman and Sheridan and President Grant are seated in the carriage during the strenuous days of frontier life. Among the collection of documents available to the public are many in vogue in the early days in the west, the old letters of accounts kept by the first postmaster, postmaster Benjamin Franklin, and the first United States stamps. There is a rare collection of stamps, including the Philippine, Porto Rican and Cuban stamps in the Philippine department's exhibit occupies 35,000 square feet.

Across the aisle, at the right, is the exhibit of the United States Commissioner and Labor, occupying 1,500 square feet. This exhibit is what the new executive departments have to offer. It is a collection of the work of the Commissioner of Labor, but charge of the preparation of the exhibit. The exhibit is arranged by labor, showing the rapid development of the industry and the various occupations, population, etc., and all the products of the labor of the United States. The exhibit is arranged by labor, showing the rapid development of the industry and the various occupations, population, etc., and all the products of the labor of the United States.
