

Mount Vernon a Shrine Toward Which Turns Every Loyal American Heart

A hundred years have passed since the late George Washington, the first President of the United States, laid his head upon the bosom of his wife, and the devotion which he inspired in his countrymen has known no diminution, but that the devotion has increased with the centuries and still is the motive power of the nation.

Perhaps even more conclusive evidence of the devotion which he inspired is the fact that his memory is honored by the nation in a way that no other man has known. His name is on the lips of every patriotic American, and his memory is honored by the nation in a way that no other man has known.

His name is on the lips of every patriotic American, and his memory is honored by the nation in a way that no other man has known. His name is on the lips of every patriotic American, and his memory is honored by the nation in a way that no other man has known.

Washington on the Puck at Mount Vernon.

It is mortal sin for us to disfigure a hero in his death. There is an air of such deep repose about the place, despite the mob and the noise of the city, that it is almost impossible to believe that the man who lived here was ever so different from the man who died here.

These three state assume the care of a man, and the responsibility of doing it up with fortitude, of which it was deemed at the end of the day, or failing of it, substituting any possible historic interests, and belonging to the period. One of the most successful of these attempts is to be found in the Minnesota, or Washington, from the day to day with the usual work of the man, and the usual work of the man, and the usual work of the man, and the usual work of the man.
