Fure fresh air, day and night, one of the prime essentials for ke-ing fowls in good health.

When the cream has been held at churning temperature for a period of two or three hours, it is ready to be churned.

A good way to keep manure for the garden is to fill a large box, turning it over with a fork about once a week and keeping it moist.

week and keeping it move. The government is avoiding out experts to various parts of the country to teach fruit grovers the best methods of appaying their trees.

When shrubs are first planted they should ghe headed back one-half or more, but after they become established they should be allowed to brashe at will.

One of the prominent symptoms of

One of the prominent symptoms o shoulder lameness in horses is a di-ficulty of lifting and extending th-limb, which is particularly noticeable when the patient is urged to trot.

when the patient is urged to rot.

The fine beetle is a small, metallic bins insect which is destructive to the second of the se

The earliest sown lettuce should be of some of the loose growing varieties. For summer use plant cabbage lettuce, or heading varieties, as the leaves during the warm season will be whiter and more crisp.

Suy beans shed their leaves before the grain begins to ripen; therefore when hay is desired the plants must be cut when half or more of the peals are fully grown, but before the beans begin to harden.

are july grown, out necore the near head to have a continue to a colling it is best in cutting rane for solling it is best to cut about four inches from the ground. It is advisable to arrange the cutting so that each day's product will be consumed within that time, as the foliage soon within and is then not relibbed so much.

The number of hogs per acre de-ends on the stand of clover, the sea-on and the earliness of turning in.

In order to keep fowls healthy we must breed for health just as we would for any other desired quality. For feeding lambs to be used for breeding purposes preference should be given to bran, oats and linseed meal.

When the young poults begin t their long wing flight feathers, require extra care and attention

Preture extra care and attention.

and grass and to conserve moisture.

Some states prohibit the importation of dairy and breeding cattle until

they are tuberculin tested, but permit as yet unrestricted sale of stock within the boundaries.

Rape is especially valuable for breeding ewes in midsummer, when the pastures begin to fall, as the suc-culent feed keeps up the supply of milk for the lambs.

Never overfeed or feed pepper or other condiments to the hens you ex-pect to furnish eggs for hatching. If you do, infertile eggs and weak chicks will be the result.

you do, ladertile eggs and weak chiefe will be the result. The Wisconsin experiment matton finds lime is defected in much of the dark lime is defected in much of the control of the contr

A grape vine to bear well must be cultivated and carefully pruned each year, cutting back to two, three, or not more than four cames, and care-fully pinching off surplus young shoots during the summer.

shoots during the summer. There is something in suiting the corn to the soil. Trying to suit the soil to the corn in a tough proposition, as many a man who has tried more upland has found to his sorrow. The positive products of the United States are jets on a par with which and hay. The combined value of the three last year was around two millions caches.

millions each.

Do not oppose the cow's appellte. She knows what it takes to make a balanced ration better than any feeding standard. If she does not like bran and corn, give oats and corn. If she is tired of fodder by all means try a little clover hay.

The sitting from most not be dis-turbed. If eggs are laid in the same near with those that are hatching: I these of ground well than to plant is often difficult to tell the fresh one large fields and give them only half from the others, hence party hatched eggs are taken out instead of the error week with the properties of the error week with the properties of the error week with the pro-serve me was the second of the
