**VICINITY NEWS NOTES**

**Mapplings in the Surrounding Country Which Will Be of Interest to Our Many Readers.**

The Woodstock army was burned down last Saturday morning, installing a combustible box.

The first fatality from the influenza epidemic occurred in the medical history of Elgin, occurred three Thursday morning when a ten months old boy succumbed to the ravages of the disease.

The child had suffered with the disease for three months. Within two days from the time the child was stricken he was a helpless victim. At present there is no other such case known. In medical circles infantile paralysis is known as poliomyelitis. Researches are being made to determine the cause of the disease, which is said to be infectious and possibly contagious. Its communicable period is during the stage when the disease is developing.
