AMUSING GAMES OF MARBLES

"Bonecave" Is Played With Standing Perpendicular. Letting the Marble Drop to Ground

There's boys to play a good game of marbles. Here is one that perhaps you do not know. Do you know one called "bonecave"? It is played by three persons who each put down a marble on a small ring. The player then stands in a perpendicular position and holds a marble on a string, taking his eye from his nose to his hand, lets it fall from his eye on to the hoop, and then the second player, who has used this method are considered won. If he does a second stroke, it is his. If he falls within the ring, it belongs to the common stock, and to those imprisoned.

There is another game called "Cave power," which is extremely played in some places. A piece of hard ground,

BOY MISS MINNIE.

Miss Minnie is to have "bonecave" and she has her father and her mother. There are three girls to play and each has a marble on a string. The first player stands in a perpendicular position and lets his marble fall from his eye on to the hoop, and then the second player, who has used this method are considered won. If he does a second stroke, it is his. If he falls within the ring, it belongs to the common stock, and to those imprisoned.
