## COMMUNITY CLEANLINESS.

It is a mistake to think of cleanliness as much as a factor in our health and comfort. A clean, well-kept neighborhood is always a more beautiful place than one that is filthy and unclean. It is a mistake to think of cleanliness as much as a factor in our health and comfort. A clean, well-kept neighborhood is always a more beautiful place than one that is filthy and unclean.

In all neighborhood work for the general good, we can do much by seeing a given property clean. If you begin to clean up and make tidy and attractive the premises which I occupy and which I see in my district, I will surely do my best to see that I am as clean and as tidy as I can be. I will surely do my best to see that I am as clean and as tidy as I can be.

It is a mighty hard job for a new community when all its neighbors are in lively competition with each other to see who shall have the most attractive and best kept property.

But in order for us to have community beauty, health and comfort, we must have community effort. Community effort means that we must look at things from the viewpoint of the community good and we must all work together to that end. The "new" law does not make a summer, so the old way goes, and neither do the new laws and well-kept lawn make a neat and well-kept community. It is true that as one small means that we can do much by seeing a given property clean.

One other thought in this connection, and it is this: Time and labor spent in cleaning up and beautifying our surroundings adds to the money value of the property. People are willing to pay more for a property that is clean and well-kept than for one that is filthy and unclean.

**HOUSE SENSE.**  
The Washington Sun says that last week a horse was left hitched to a buggy and tied to the rail at the corner house square for 40 hours. At the end of that time the animal was taken care of and the police. The unnamed owner of the outfit, says the Sun, "is being ruinously penalized."

It would seem to us that the police are nearly as much to blame as the owner of the outfit. The police should leave his faithful servant stand out for 40 hours, exposed to the hot sun by day and without food or drink, in whatever the name of man, but it is a lesser offense for the officers of the law who must have been aware of the circumstance, to close their eyes to such cruelty? We think not. Authorities who have no better regard for their duties than that are worthy of nothing save their immediate discharge.

Proper treatment of man's most serious enemy, the tick, is now being given not only of humanity, but of good horse sense. In return for food and water, and protection from the heat which, a horse will do man's bidding throughout his lifetime, he is to be a short-legged man indeed who will not give him the horse's best friend.

The police men of the Chicago Herald Tribune say that this city has the highest typhoid rate. "Flies are filthy—they may be filthy with typhoid germs. How is the time to fight the flies—by killing them by typhoid germs. It is a little time each day swatting flies so that you can work in bed with typhoid fever."

# BETTY, the LOBBYIST

By Annie Hirschman

Betty Grierson rose from her seat on the rock and walked to the front of the crowd which stood by the roadside and took a large sign bearing the words, "Vote for Women." She held the lettered banner, spread to the widest extent, across the side of the car in the full view of the road. She returned to the rock.

An automobile whirled down the road as it drew near the car at the roadside and the girl on the rock by rapid speed was fleeing. But when it came opposite the banner the car was suddenly retarded and it came to a stop. Betty grierson rose from her seat on the rock and walked to the front of the crowd which stood by the roadside and took a large sign bearing the words, "Vote for Women."

Betty turned behind her toward a young man with his hat in his hand. "I'm glad to see you," she said. "I thought you were still here. I'm glad to see you."

"I have had an accident," she said. "I was run over by a car. I was run over by a car. I was run over by a car."

"What has she to do with the car?" Betty asked. "What has she to do with the car?" Betty asked. "What has she to do with the car?"

"I'm glad to see you," Betty said. "I thought you were still here. I'm glad to see you."
