OR KIDNEY, LIVER AND STOMACH TROUBLE

Consider the convenience, comfort and economy of Electrical Service

It furnishes the most perfect, most healthful, most satisfactory of all illuminants. You may place electric lamps anywhere-light up corners that without it would have to remain in darkness: Electricity will do the washing and ironing, sweep the floors, operate a great variety of machines and appliances that worked by hand mean exhausting labor and do everything at a surprisingly low cost. A house equipped for the service is a pleasanter place to live in for it modernizes the place.

By our method of sciring houses at cost, fixtures included, payable in 27 month-ly installments, without interest,

Electric service in the home is brought within the reach of the most moderate income.
