Grewth of Electric Lighting.
There is much of interest in a late
builtin issued by the census bureau
of the department of commerce and isbor, which shows the growth of the

electrical industry during the last flees;

proceeding langua were flert used commercially, to a limited extent, in 1876,
but the first central electric light station supplying current to such lamps was not installed until 1870. Insyanmercially during 1880 and 1881, and
leff site central station commonered operations in 1882, but during the incerin a number of lestated lighting the state of the latest lighting the beautiful processes. Silvertricity has been used commonercially less than twoty-dree yaves, yet during this compar-tatively short prefet the industry had were much older. The surface processes are the latest properties. were nuch older. The urban popula-tion is now largely and in some locali tion is now largely and in some locali-ties absolutely dependent upon it for transportation facilities, artificial light and power for manufacturing. Of the 1,802 places reported at the twelfth gensus as having a population of 2,500 and over, 1,511 had one or more central electric stations operated either indeprindently or in connection with an else-tric milear, and there were Liolo places with a muscle portain have placed with a muscle portainto have until it is lost, and then its miles of the indentity is indicated by the following tables in indicated by crite conscience.

Number of electric stations The report gives some significant in-

The report gives some significant in-formation as to municipal ownership-as compared with the contract system of electric lighting. The municipal plants number 815 and supply N; per cent of the electricity for incombecent lights and 132 per cent of that used for res lights. The average cost of publi-ers lights, the average cost of publi-ers lights in the properties of the properties of the properties of the pro-tection of the properties of the pro-viding to the properties of the pro-viding for illumination.

On Saturday evening, January 16, at Barrington Center, occurred the death of Joseph Wolaver, son of Mr. and Mrs. Edward Wolaver. The young man was born September 3, 1888 and has lived in this vicinity nearly all his short life.

The illness to which he many year-ed was of a peculiar and nearly in-comprehensible nature of which few cases have been on record in the world. It was an inate, nervous dis-order, professionally known as "desu-opsendo, muscular hypodrophy," and opseudo, muscula operation of the was accompanied by an abnormal development of the fatty tissues of the body with arrested development of muscular action, leaving the invalid nuscum action, caving the invalue entirely helpiess to perform the slight-est natural movements. Fortunately no suffering attended these strange conditions of the body while the ne-tivity of the mind was increased. He had reached the weight of 300 pounds.

In disposition he was remarkably seerful and patient with a keen sense
