### EDITORIAL COMMENT

According to crop reports from Europe, the harvests in Prance, Austria-Hungary and Italy show the effouts of the drought or extreme heat. In Austria-Hungary the wheat and rye crops are below the average. Oats and straw are bad, but hay good. Italy's corn crop is generally below the average and in some districts only one fourth of last year's yield. In France, where heat privated during the growth of the whoat crop averages well and is of escellent quality, but one of the control of the whoat crop varieties of fodder are bad. It when the fodder crop varieties of the whoat crop varieti

The late Episcopal general coaven-tion passed a constitutional amendment permitting, special forms of service to fit special cases. It is thought that many Lutheran bodies may be brought to over to the Episcopal cannot be the amount of the control of the concession. The Episcopal and Lutheran an worship differs chieldy in fluturical forms. There are five general bodies of Lutherans in America, besides six-teen independent syrods and many in-dependent congregations. A general movement of Lutherans to the Episcopal ranks is not probable, but many of the independent syrods and congrega-tions may until notice to strengthen

If we cannot all enjoy a season of grand opera it is pleasant to know that some of our favored countrymen and country women can. The American musical critics assert that this country will have more first class artists on the boards the coming winter than will be heard in the great music centers of Europe, notably Berlin. Of course it is American cash that does the business, but it is a step in advance to be certain of getting good music for good money.

The new Russian railroad around Lake Balkai is a triumph of engineering. The section along the lake is mountainous, the rocks in some places extending into the lake. On this strip of fifty miles there are flifty-two tunnels and 210 bridges and viaducts. The construction of this line was the most expensive bit of railroad work ever undertaken in Russia.

England is agitated over the discovery that emigration of her sturdy native stock to the United States is increasing and that her pressure in crowded etites is not relieved thereby, because of an influx of allens from eastern Europe of a class not desirable.

Punishment by Demand.

A conspicuous case of international demand for the punishment of violation of neutrality at sea was that made by Brazil of the United States tion of neutrality at sea was that made by liraril of the United States poverament in 1804, when the Federal gunboat Wachusetts attacked the Confederate cruiser Florida at Bahia. Brazillian corvet took station between the belligerents to enforce neutrality, but the cuptain of the Wachusetts, under pretense of an accident, and his ship past the corvet at night and with a full head of steam on crashed into the Florida. Finding that the cruiser did not sink, he opened fire and caused her to surrender. The emperor of Brazil immediately demanded reparation, the captain was court martialed, and the United States consul at Bahia, who had advised the outrage, was summarily dismissed. Furthermore, the Brazillian flag was saluted at the scene of the attack, the captured crew released, and the cruiser would have been surrendered to the Confederacy but for the fact that she had been accidentally sunk in Hampton Roads, where she was held as a prize of war.

prize of wat.

A Badly Battered Warship.

The effect of big run five upon modern wraships was seen in the case of the Bussian vessel aktobid in the battle sortie from Port Arthur. The Askobi led the sortie from Port Arthur Aug. 10, and, aithough shelis were rained upon the creases, the was able to pierce the lines of the enemy without excessive damage. Then a struggle ensuale between the two deets up to the time when sach vessel of the Russian feet looked to its own safety and tried to escape. The Askob was pursued by the cruiser Kasuga and a gunbact, but yet cruiser Kasuga and a gunbact, but yet cruiser have been supported in the ship was as full of boles as a sieve. On the starboard side there was wrenched away a portion of her safe six feet in diameter above the water line, the hole having been plugged with mattresses, barrels or what-

The Barrington Review ever lay at hand. Two of the funnels were held in place by a thin sheet of metals while the rear of the pool was made, while the rear of the pool was mobilized but a mass of broken, disjointment of the pool of th shells had transformed everything into a mass of ruin, four boilers were irrep-arably damaged, one of the great can-non was twisted as if it had been a straw and its shield destroyed. The battle casualities among the crew was slight, only twelve killed and forty

The current year gives weather students food for speculation. The vapries of the past tweive means to some of the old axious, especially that an early winter means a warm summer. Cold set in early last year and was intense as well as you and that a cold winter means a warm summer. Cold set in early last year and was intense as well as you considered warm. It is said that cold, best, rainfall and snow insintain an average has all as soon winnination as were your by year. If the sum has the coming winter should be a store of heat due to this sound to be store of heat due to this sound to the said warmer has not been delivered. At any rate, there ought to be store of heat due to this globs, for its average has not been delivered.

"A "hospital car" attached to each through passenger train, with attendants trained in giving die to the interest of the care trained in giving die to the interest of the care trained in giving die to the interest of the care trained of the cassare a time public in these days of frequent accidents. For those who must trave by rail and for the friends left behind this plan has its good points. But people merely anticipating a pleasure trip may take second thought at sight of the ambulance attachment and stay at home.

come put a penny in the churn," is an old time dairy proverb. It often seems to work though no one has ever told why.

When mothers are worried because the children do not gain strength and flesh we say give them Scott's Emul-

It is like the penny in the milk because it works and because there is something astonishing about it.

Scott's Emulsion is simply a milk of pure cod liver oil with some hypophosphites especially prepared for delicate stomachs.

Children take to it naturally because they like the taste and the remedy takes just as naturally to the children because it is so perfectly adapted to their wants

For all weak and pale and thin children Scott's Emulsion is the most satisfactory treat-

We will send you the penny, Le., a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy. SCOTT & BOWNE, Chemists, Chemists, 409 Pearl St., N. Y.

You can depend on Ayer's Hair Vigor to restore color to your gray hair, every time. Follow directions and it never fails to do this work. It stops

Hair Vigor falling of the hair, also. There's great satisfaction in knowing you are not going to be disappointed. Isn't that so?

"My hair faded until it was about white. It spok just one bottle of Ayer's Bair Vicer to the spok just one bottle of Ayer's Bair Vicer to Hair Vicer certainly done what you claim for it."—A. M. BOUGAN, Rockingham, S. C. STER a bottle.
