

## RAIDS BIG COCK FIGHT

A  
McHenry County Sheriff Routs  
Two Hundred "Sports"

from Pickn Grounds

Two hundred "sports" who liked the early miles to the city grounds, about five miles out of this place, were routed by Sheriff J. Stanley, while in the midst of a twenty-four hour cock fighting tournament.

There were no arrests, because the owner of the land of the law had been tipped off to the trouble. The birds and the owners were hustled out of the pit, so that when the sheriff arrived on the scene with a crew of eight deputies, battling with weapons, the sight which greeted his eyes was a scene of confusion.

There were twenty lawfully licensed cock fighting pits in the area, but the McHenry county officials, who had been tipped off to the trouble, were not to be taken in by the law. The sheriff and his deputies, who were tipped off to the trouble, were not to be taken in by the law.

## MILK PRODUCERS MEET

Local Members Elect Officers and Delegates, Hearings Held, Picture in Tribune

The local members of the Milk Producers' Association met on Tuesday morning at the village hall and elected Fred Kirschner chairman for the ensuing year, and U. S. Hawley secretary and treasurer.

Messrs. Hawley and Kirschner were also appointed as delegates to attend the milk producers' meeting to be held in Chicago, February 3. Sam Glusko and Henry Donley were the alternates.

The Chicago Tribune this morning published a cartoon containing pictures of some of the leading lights in the dairymen's fight against the milk dealers. Among them was a cartoon illustration of J. A. Hawley in the attitude of expanding knowledge on the important subject of milk.

## HARDER HAS RUNAWAY

Horses Break Off from Hitching Posts at Bank Corner But Do No Further Damage

Edgar Handen, had the misfortune to have his team run away while he was in the act of making preparations for the day when the few minutes before Saturday evening. This time it was not a horse, but a team of horses, which were running away from the hitching posts at the bank corner. The horses were running away from the hitching posts at the bank corner.

## ELECTRICITY NOT HIGHER.

Base Load Power are Laboring Under a Rate Increase, But New Company Charges More

A number of companies of electricity have complained that their bills for lighting have materially increased since the new company has taken charge. One gentleman said that the bill for last December was the largest he ever saw in December. 1908, that bill was \$1.00. 1909, the same figure was being paid, and the rate of electricity is a little lower. There should be no increase in your electric bill, but some are using more.

The bill of the company comes to more with general approval. In order that consumers may get the best light possible, more and more light bulbs are being used, and the rate of electricity is a little lower. There should be no increase in your electric bill, but some are using more.

## AT THE CHICAGO THEATRES

At the Olympic  
"The Fortune Hunter," Windisch's capital comedy of American life, has surpassed the expectations of its producers, Messrs. Cohen and Hart, in its Chicago engagement, and before the close of the first week can fairly be pronounced a success with theatre-goers of the day.

Nearly everyone who has seen the performance of a voluntary prayer, the virtues of this delightful play. To this fact is Chicago now adding the credit of its own success. The "New York Herald" says: "The play is a masterpiece of its kind. It is a masterpiece of its kind. It is a masterpiece of its kind."

"Why, mother," said Miss Belinda, "I'm not. I'm just getting ready to go."

# Studebaker E-M-F 30, Studebaker Flanders 20

Here we are with two of the greatest cars of the year, built and guaranteed by the old reliable Studebaker Automobile Co.

The E-M-F 30, a five passenger, 4 cylinder, 30 horse power car with 100 inch wheel base is the greatest car known for the money. It sells at the nominal price of

**\$1250.00**

The Studebaker Flanders 20 with 100 inch wheel base, 4 cylinder, 30 horse power, 4 passenger car, complete with gas and oil tanks, horns and magnets is the greatest over built for the small price of

**\$790.00**

Before placing your order call and see us for prices and terms  
**PROUTY & JENCKS**

### THE DAIRY

#### DAIRY NOTES

Cows that give the richest milk are more apt to produce offspring that will do the same.

For his good the farmer should be sure his herd, whether beef or dairy, is free from tuberculosis. Immediately after parturition the cream should be cooled to the temperature of the water direct from the well.

In any milking a part of the milk is bloody or stringy or unnatural in appearance, the whole mass should be rejected.

Separators have become common knowledge through the use of power machines at creameries and separating stations.

A cow that gives rich milk and is kept in good condition will produce a butter that will do the same.

If after churning the butter is not free from lumps it is better to make a few hours. This often makes a wonderful success.

The breeder of Shorthorns to produce milkers must actually engage in dairying at least in so far as the handling of his cows are concerned.

The well bred special purpose dairy cow is supposed and expected to do a little better with the feed she consumes than the ordinary cow, consuming the same ration.

Milk quality quickly, cleanly, and thoroughly. Cow that not only increases early milking and dairy. Commence milking at the earliest the same hour every morning and evening, and milk the cows in the same order.

The dual-purpose cow will produce only one dollar's worth of milk for one dollar's worth of feed. The successful dairymen must have the cow that is especially built for the production of milk; the cow that will produce one dollar's worth of milk for one dollar's worth of feed.

#### DEICE KEEPS THESE MOIST

With This Protector Dairy Product May Be Kept Fresh for Considerable Length of Time.

A contrivance that will be almost invaluable in the cheese producer's arsenal is a Whickman case. With this a cheese may be kept fresh and moist for a long time and not only safe

from injury, but give greater richness

#### DAIRY HERO IN THE WINTER

Close Study of Individual Cow is Necessary if Results Are to be Profitable

BY W. R. GILBERT

Not long ago I was looking at a herd of milk cows in winter. It was the month of all events, yielding a handsome profit to the owner, and differs in this way from many similar herds.

It was the more interesting, therefore, to look over the arrangement of a herd by which this feat is accomplished. There was, as the owner pointed out, no secret to disclose.

He is a man who lives on the product of his herd, and has made better a much greater factor in his prosperity than in the case with his neighbor. What he insisted upon as regards feeding might be compared to

the first was that which may be described as individuality. In other words he paid no regard to the "ra-tions" which many text-books give for the cow.

There was no such thing, he said, as the "average cow." Some eat more and some eat less, no did their eating bear any proportion that he could read out to the amount of milk they yielded.

It contradicted the employment of a man who knew the idiosyncrasies of each cow, and gave her what she should eat, and nothing more.

There was no such thing, he said, as the "average cow." Some eat more and some eat less, no did their eating bear any proportion that he could read out to the amount of milk they yielded.

It contradicted the employment of a man who knew the idiosyncrasies of each cow, and gave her what she should eat, and nothing more.

There was no such thing, he said, as the "average cow." Some eat more and some eat less, no did their eating bear any proportion that he could read out to the amount of milk they yielded.

It contradicted the employment of a man who knew the idiosyncrasies of each cow, and gave her what she should eat, and nothing more.

There was no such thing, he said, as the "average cow." Some eat more and some eat less, no did their eating bear any proportion that he could read out to the amount of milk they yielded.

It contradicted the employment of a man who knew the idiosyncrasies of each cow, and gave her what she should eat, and nothing more.

There was no such thing, he said, as the "average cow." Some eat more and some eat less, no did their eating bear any proportion that he could read out to the amount of milk they yielded.

for no state, nor, but they are kept in a mode of sanitary cleanliness. Air was given to the admission of plenty of fresh air, without draught, and the farmer held that to keep a cow healthy a certain amount of light is necessary for the winter months.

All liquid sewage was carried off by means of a drain. The dairy itself was a model of spotless cleanliness. This, of course, was a virtue in itself, but the farmer explained that he did not expect it to be his own reward, but had made a good circle of customers and was in the habit of charging them somewhat more than market prices for butter in winter. He insured that it would be of the very best quality, and of course made under conditions of the utmost cleanliness.

Not Yet Invented. "I understand that he painted cows with his hands, but he said that the hired girl were herself not trying to sweep them down." There may have been such an incident, but there never was such a hired girl.

Just a Protest. "If my songs are sung in heaven 'till be all the four I ask, most of it, since a Buffalo news paper. You, kindly remember that the Buffalo of other folks, pointed to death here on earth, who had hoped to find peace in the land."

Prodigal and Miser. "The prodigal took his heir, the miser took his money, the prodigal took his heir, the miser took his money."

A Tame of Oysters. There are 1,000 oysters of full size in a ton.
