

WORST-TORMING '81

All Recent Winter Records are

Broken the Past

Week.

It's 29 years since we have had a winter as cold the present one, say the old timers who remember what the winter of 1880-81. The ground at that time, they say, was covered with about the same amount of snow as we now have, at about this time of the year, but in February, it is stated by those who remember, more storms were forthcoming and the snow then was four or five feet deep on the level. If this winter is to be a parallel for that one, you can see what it is like. The birds are taking the optimistic view, however, and hope we have had all the snow that we are going to get. We have had enough to allow the younger generation to form some idea of what an "old fashioned winter" is like.

With snow two feet deeper the level of the water in the lake is up to Friday morning, all trains were tied up, not for days as they used to be, but for hours. The cars on the lake train, due to leave here at 5:25 a. m. on Chicago, did not get started until 10:30 and arrived at Chicago started until nearly noon. The train which leaves Chicago for Chicago, which was nearly three days in reaching Arlington Heights, and which arrived at Chicago, the passengers were transferred to another train and reached here shortly after 10:30. The train which was nearly three days in reaching Arlington Heights, and which arrived at Chicago, the passengers were transferred to another train and reached here shortly after 10:30.

The Chicago & Northwestern company had large gangs of workmen out on the lake all night long, clearing the snow on their right of way. About 10:30 m. cleared a good part of the snow on the right of way. Monday and hauled it away at a cost to the railroad company of more than \$100,000.

CHURCH NOTES.

BAPTIST.

The sermon topics at the Baptist

church on Sunday will be, 'Is this a

m.-Baptism—its History, Signifi-

cance and Christian Significance.' Test-

imony will be given by Rev. W. H. Bap-

tism, wherein also 'ye are raised

with Him.' 7:30 p. m.—'Some An-

swers to Questions Asked in Expla-

ining the Meaning of Saving.'

At 10:30 Saturday evening there will

be a devotional meeting, the subject

to be 'A Study of Jesus in His Prayer

Life.'

Rev. W. M. Wilmer, our new W. Y.

P. U. president, will deliver the meet-

ing on Sunday evening at 6:45. We are

glad to see the interest shown by the

increasing attendance at the young

people's meeting.

The results of the faithful work

of our Sunday school, superintendent,

Mrs. Brockway, were apparent in the

excellent attendance last Sabbath.

The primary department last Sabbath

completed the work on its colonial

epoch, which is well to be re-

corded in the other departments.

The pastor's home club will meet at

the A. M. C. grammarian from 2:30

to 4:30 every Saturday afternoon

throughout the winter. Regular

services will be given by Rev. W. H. Bap-

tism, superintendent of the ladies' aid

work will be given. The program for

next Saturday evening will be call-

ed 'The Human Elephant and the

elephant.'

Bull Fights

Great Only as Relic of Barbarism

By F. EVAN JONES

It is difficult for an American visitor to Mexico to come to any other conclusion than that the bull fight is "open only as a relic of barbarism. Many American tourists in Mexico attend a performance just to see. They do it for the same reason that visitors in museums look upon the instruments of torture from the middle ages not to enjoy, but to see and learn, in order to be able to speak of it intelligently.

During a trip to Mexico in 1906 a friend of mine urged me to see a performance in Mexico City. While I was there on a Sunday afternoon seven bulls and 12 horses were killed and one man mortally wounded, with 20,000 people looking on. The animals had my sympathy, but the matador got what he deserved. The bull was brave, fighting alone with the weapons nature had given him, till his strength gave out and he fell dead. Against him were more than a score of his murderers, ready to assist each other in case of need.

The bull fight is of the same nature and exists for the same reason as the battles of the gladiators at the imperial festivals in ancient Rome. The gladiators were trained slaves. When marching out on the floor of the Coliseum to kill and be killed, passing by the throne of Caesar, they cried out: "We who are about to die salute thee!"

In the twentieth century the bull has been substituted for gladiators. Caesar gave his entertainment to the freedmen, as he wanted favors and needed their votes. The rules of Mexico favor bull fights and the Latin Americans they conduct in the name of the state. The people must be amused and forget about a representative government. When Mexico becomes a republic in reality and not merely in name—though that may be far off at present—there will be no more bull fights.

Strictly Modern Stucco Houses

By C. C. DOMBRO

By plastering the outside of frame houses with cement mortar, which becomes as hard as stone and more durable.

In many instances this is colored with light tints and the effect is as follows:

When this fashion shall generally prevail and the unlightness of wood be banished with the handsome stucco finish, there will be a transformation which will make all parts of Chicago uniformly attractive.

Halley's Comet and Cold Weather

By ELMER SCHMIDT

Noah Webster (author of Webster's dictionary) gave his opinion, over a century ago, that the near approach of great comets was accompanied (with few exceptions) by severe winters.

Halley's comet is now nearer to the orbit of Mars, I believe, than any other planet, and it is coming very close.

Whether Webster's view is right or wrong, it is interesting to note a report from an astronomer, at the observatory at Palermo, Italy, that he observed a remarkably early snowfall in the antarctic regions of May on November 17 and 18. Perhaps the comet will near us too late to affect our winter in any great degree.

As to the view of some that a comet is composed of so extremely attenuated matter that it cannot produce any practical effects, I would ask, may it not, however, contain great magnetic, electric or other unknown forces?

Football Is Too Violent as Played

By JAMES J. SMITH

This season there have been a number of lives sacrificed in college football games.

As to the view of some that a comet is composed of so extremely attenuated matter that it cannot produce any practical effects, I would ask, may it not, however, contain great magnetic, electric or other unknown forces?

Mexico Is Deeply Religious Bent

By H. K. ROBERTS

In Mexico the masses are of a deeply religious bent. In a brief introductory speech, referred to the first conference of state bishops, invited by the president.

I had occasion in a recent visit there to note the deep-faithful of the earthly descendants of Matruana.

In going along our roads it is a common sight to see the sign of the cross that owners of farms and ranches have erected even if they only employed a couple of rude slaves.

In the humblest adobe huts there are pictures of the virgin and the saints and others.

Such devout conduct does not invariably go with the highest morality, but I have no doubt that their religion has a beneficent effect and that it has a tendency to make the people lead purer lives.

CARDPORT PLEDGES

"AFR ANNOUNCES THAT WHILE PRESIDENT "SOMETHING" WILL BE DONE.

DEFIES FRIEND AND FOE

Tell Critics That of Republican Will Be Voters for Measures Pledged in Campaign Form.

Washington—President Taft has set his back against the wall, made a stand, and is now holding his ground. He has defied his friends and the country at large, and has said that he will not be moved from his position. He has said that he will not be moved from his position.

That something, the president made himself clear. He said that he will not be moved from his position. He said that he will not be moved from his position.

The establishment of a system of public service, the president said, is a matter of course. He said that he will not be moved from his position.

The president mentioned two important matters, and he said that he will not be moved from his position. He said that he will not be moved from his position.

Representatives have of California, Maryland and Kansas. He said that he will not be moved from his position.

John R. Walsh in Leavenworth. He said that he will not be moved from his position.

Chicago—John R. Walsh, convicted of misappropriating the funds of the Defunct Chicago National Bank, was sentenced to the federal penitentiary at Leavenworth, Kansas, to serve a term of ten years.

He left last night for the federal penitentiary at Leavenworth, Kansas, to serve a term of ten years.

STATE NEWS IN BRIEF

Springfield—Judge J. O. Humphrey of the United States circuit court, on the 10th inst., received an order on the attorney general to issue a writ of habeas corpus for the Chicago, Peoria and North-Western railroad.

Chicago—Despondent because of the long illness of a married woman, Mrs. Sylvia Shadock, 26 years old, swallowed chloroform and then hanged herself in a sack made of fur. She was found by the Chicago police, and was taken to the hospital.
