

## TAG DAY AGAIN HERE

On June Eleventh Girls Will Col-

**Charitable Institutions.**

—

Last year it was decided that a big day should be had for the three charitable institutions of Lake county, namely, the McAllister hospital, the Lake

The Tuberculous Institute is near Garmes, west of Washington, and is a camp, under the guidance of Dr. W. H. Wampler, fitted for handling many cases of tuberculosis in the early stages of treatment. McALLISTER Hospital is in the city of Washington, in the country hospital for Lung patients.

**AN EXCELLENT PLAY.**  
S. Y. P. U. Members are to Be Congratulated Upon Their Success.

As large a crowd as could comfortably fill Stout's hall was present last Monday evening to see the plays given by the members of the Baptist Young Peoples' union, assisted by a few friends. As for the plays, they were all that could be wished for and the friends and parents of the young people should feel proud indeed of their excellent work. Much of their success was probably due to the excellent training given them by Mrs. May Lane Spenser, who had charge of the production. The plays met with such favor here that they are contemplating presenting them at Wauconda at some date in the near future and if they decide to do so we feel sure that Wauconda residents will be equally pleased.

The women in Chicago will sing. Miss Mary Smith, violinist, will play. Deputy Superintendent George W. Smith, Jr., will present the diplomas to the graduating classes. The school will give "The Plains," will be given Friday evening, June 10, at 7.15 sharp, in the Highwood North milk products factory building. Prices 25 and 35 cents.

Lacey & Company sell H. & M. double palms, ready for use, in exact place to suit purchaser.

## AT THE CHICAGO THEATRES

At the Olympic

"The Olympic Games" opens its  
season with the Olympic Games, which  
with Thomas W. Yon in the title role  
of the prizefighter, who is sent to  
the country towns to win the  
local banker's daughter and fortune  
through the scheme of the shrewd  
Wall Street broker.

The grand run this comedy has  
enjoyed in Chicago demonstrates the  
popularity of the public of the im-  
mense number of 100,000,000 of  
Americans, millions and millions.

The adventures of the Olympic Games  
for the fortune seeking to the  
search for the fortune seeking to the  
riches are replete with comedy and  
humor, through which there is an  
as additional strain of the pathetic. A  
happy combination of tears that  
you cry happy tears, because  
that intrigues. The honest, big-  
hearted, and generous, and the  
inventor as played by Frank Brown, is  
a pleasing foil for the ingenuous, but  
readily convicted young play stage,  
in the working out of the story of a  
life that shows us the intricate  
knowledge of the subject by the author  
and the play.

## SAY! MR. FARMER

How much of your corn rotted in the  
shed or much lost winter? How much time did  
you spend digging it out? How much seed  
did you lose? How much of the seed  
A also would have saved all the work with  
half the labor and would have fed more than  
one-half more corn. It is estimated that 100,000  
of average corn will feed thirty-three cows for  
one year. In every large dairy district the  
farmers are using the advantages of the silo.  
The record silo can be erected at a moderate  
cost. The Bushnell Hinge Door Silo is  
made in one of the most up-to-date plants in  
the country, by the latest improved machinery.  
The mechanical construction is correct, and its  
result is a perfect silage keeper superior to sub-  
stantiate its claim to having no equal in its  
class by itself—the silo pre-eminence.

## Good Printing

"Your specimens are all very neat and tasty"  
was the verdict of F. J. Trefe—chief instructor  
of the Inland Printer Technical school, and a  
recognized authority on printed things—after look-  
ing over a bunch of our samples recently.

\* That statement amounts to considerable, coming  
as it does from a man who daily inspects work  
done by the best artists in the world.

\* It means that our work is far above the average  
we are qualified to do—YOUR work, no  
matter how particular you are.

\* We recently added to our equipment a new and  
modern cylinder press, thus greatly improving our  
facilities.

\* We can handle any job, no matter how large  
no how well it must be executed. We're not  
above the small and ordinary jobs either. All have  
the same careful attention.

\* Let us do your work, be it much or little.  
You will be pleased we feel sure.

## WHAT MEN WOULD DO

Without our daily cleaning establishment we are at a loss to know, for we remove the waxiness of so many men that we have become an institution in this city. Clothes that require cleaning should be sent here by all means. Our method is so general that we feel sure that once you try it you will send your garments here for cleaning right along.

## HORTICULTURAL NOTES.

Do not fail to guard the young trees against rabbits.

Send seeds of rare, native and exotic plants to the window box.

A bed of nasturtiums will supply blossoms until frost comes.

The more we eat a young orchard the deeper the roots become.

Vine crops should not be disturbed after the vines commence to run.

Portulacas, perennials, nasturtiums and California poppy yield in the hot test season.

Sometimes we have added red poppy or orange carnations and out of our of festive salutations.

If a man does not know how to prune a tree, he can, with safety at least cut out all the pickers and keep the ground free from weeds and undesirable.

If an orchard is on the decline it is an indication that the food supply in the soil is being exhausted. Proper fertilizers should be applied to thorough cultivation again.

The best way to clean up an orchard after the fruit has been picked is to turn in the soil. They will dispose of every weed or insect that has been overlooked by the pickers.

It is not too late to prune the orchard. All dead branches should be cut out of the limbs of the trees kept in the orchard.

Recent experiments done to indicate which is the most effective fertilizer which is in the fertilizer business.
