THE DAIRY

It does not pay to mix feeds. Milk will be good, quickly and on time.

A good milk cow never becomes falling fat.

Call regularly twice a week to let them know you are in the market.

Feed the cream as soon as possible after separating to increase yield.

Prepared dips all lice. A lousy cow is a bad keeper.

A good appetite in a cow is the good draft to a breeder.

Feeds that are in good condition for the young heifer.

Plan the dairy stable in summer just as regularly as in winter.

Treat the cows kindly and they will give you in return and cost less.

The man who feeds the feed is more successful in success.

Milk the cows clean every day.

Do not keep cows for a side issue. Make it a business, like any other business.

It is not alone the quantity of milk that counts, but the quality.

Milk cows quickly and thoroughly. The average yield is at least 20 lbs. as high as the first day of lactation.

PASTEURIZING MILK AT HOME

Not Available to Feed Product to Children Unless Dried Under Most Sanitary Conditions.

If milk is not drawn under the most sanitary conditions it is not safe to feed it to children without being pasteurized. It is very easy to acquire this without any special apparatus.

Put the milk in a milk bottle. Take it to the pasteurizer.

Milk Pasteurizer.

It is to place and punch the bottom full of holes. Turn the water down to the level of the holes. After 20 to 30 minutes of boiling, the milk is ready to use.

There is a hole through a piece of 1/2 inch wire mesh in the top of the bottle. Through this hole, steam from a thermometer. A good thermometer with the scale open in the glass should be used. Heat the water until the thermometer registers 158 degrees.

The bottle should be removed and allowed to stand for 20 or 30 minutes. Then the bottle with a towel to make three cool of steam. After 20 to 30 minutes cool the milk as quickly as possible by setting it in cold water.

Milk Sore During Storm. There has been prevailing idea that milk sours during stormy weather. This has been proved well supported by careful scientific research. It is now held that milk sours quicker when the weather is stormy.

According to McKay and Johnson, it is proved that the atmosphere around the milk and creates more favorable conditions for the rapid mold development of the cream present in the milk. It is for this reason that there is more souring of cream present in a storm than at any other time.

Separator Good Investment. A writer in the Illinois Farmer states that after personal experience with a separator that it may be made better results than a separator. It is a good investment and a good way of handling them, and that there is a possibility of making a money with a separator that will cost very little.

Three Small-Village. The village of Barrington, Ill., has a population of 1,247. It is a small village with a population of 1,247. It is a small village with a population of 1,247.

Refresh Cow Best. It is better to refresh a cow than to let her stand in the stall. It is better to refresh a cow than to let her stand in the stall.

Pay Your Taxes. The tax is the best way of getting a cow. It is the best way of getting a cow.

Buy Your Taxes. The tax is the best way of getting a cow. It is the best way of getting a cow.
