

MAY VOTE ON SEWER

Trustees' Committee's Outline Proposition to be Submitted to Voters.—Village Board Wishes Approval

By S. M. PARDOCK. At the village election to be held next Tuesday a special ballot will be submitted to the voters, containing the following proposition: That the village proceed to construct and pay for by special assessment an outlet sewer to dispose of the present sewage and to provide an outlet for any extension of the present sewage system which may be constructed and paid for by later special assessments.

This course was decided upon at a special meeting of the village board held on Tuesday last. The proposition was introduced by the village trustees. The situation with regard to the sewer disposal system against the village has reached the point where most property owners agree to have the village take up the matter. The village authorities to avoid further litigation and expense. This gives birth to the proposition to be submitted to the voters. It is explained in a recent issue, in a plan to carry the present sewage and to provide an outlet sewer to dispose of the present sewage and to provide an outlet for any extension of the present sewage system which may be constructed and paid for by later special assessments.

The people of the class in room two of the hotel... The sewer disposal system would have to be reconstructed. This time the state regulations are those which permit the construction of outlet sewers to be paid for by special assessment. The village board which have sewerage systems, no adequate outlet there. There is no doubt as to whether or not it would hold that the drains and tiles in right place was burning. The police here the man who had his sewage pipes abandoned him and hurried away with their help. About 300 feet of wire had been stolen.
