THIS KIND OF FARMING PAYS

Ohio Farmer Raises 768 Bushels of Corn Per Acre by Using Plenty of Manure and Good Seed.

On a recent trip through northwest Ohio instructors from the College of Agriculture, Ohio State University, met a farmer, Mr. A. Leiby of Swanton, who said that the last year he had raised 4,600 bushels of corn on 27 acres, or nearly 168 bushels per acre. He did not state how this corn was measured, says the American Cultivator. When asked to tell how he had produced this big yield he said: "Plenty of manure and fertilizers, good seed, good drainage." He keeps a herd of registered Holstein cows, and all the manure is kept under a shed and well tramped down to prevent burning until ready to be hauled out. Raw rock phosphate is used to reinforce the manure and add phosphorus to the land. The seed corn was plant-selected in the fall and stored in a well-ventilated room without artificial heat. When tested last spring it showed perfect germination, and it gave what Mr. Leiby called "a perfect stand." This, he claimed, had a great deal to do with the big yield. His land is well drained, having lines of the four rods apart all over the farm. Four-inch tile is used, placed from three to four feet deep. From his conversation it was gathered that Mr. Leiby had put into practice the teachings of the college of agriculture.

GREAT AID TO THE GRUBBER

Virginia Man Has Invented Instrument With Powerful Lever Which is Quite Effective.

(By W. B. LENTZ.)

If there is any ray on earth by which grubbing can be made easy, we have never heard of it, but the following will help some. We know of no harder work than grubbing up bushes and trees.

A Virginia man has invented an instrument with a powerful lever, which has been found on trial to be quite effective in uprooting small trees. It acts a good deal as a dentist's forceps, only instead of a straight pull, which

Uprooting Small Tree.

the dentist uses, it gives a slide pull, by the use of a long handle forming the lever. The arm is rigidly attached to the base and the arm has at the end a strong jaw, capable of withstanding a great strain. On the end of the lever is another jaw co-operating with the first. The instrument is thrust close to the roots of a bush, the stem of which is seized between the two jaws and a pull on the lever brings it up by the roots.

GOOD ROADS & FARM NOTES

Single crop and grain farming must be replaced by a diversified system. Probably the great majority of soils will not be benefited by an application of lime.

The cow, the pig and the hen are a great trio that can scarcely fail to bring success. There is only one sure way of determining whether a soil needs lime, and that is by trial.

The three essential fertilizing constituents of soils are nitrogen, phosphoric acid and potash.

In applying lime to soils it should be remembered that not all soils are benefited by such applications. Do not pile manure around the barn and do not pile it in the fields. Spread it as fast as it can be taken out.

The requirements for rhubarb are a rich soil with plenty of fertilizer, but a fertilizer not strong enough to rot the roots.

The land that was plowed in the fall for next year's garden will work up better than that that must be plowed in the spring.

The average depreciation of farm machinery is figured at 10 per cent a year. A good machine should still out this down materially.

Rhubarb is so easily grown that many fall because of its simplicity. Like asparagus, rhubarb has few but very important requirements.

Hang the ladder under the eaves of the hen house; do not have it lying on the ground in the orchard to rot and break with some one next fall. The seven states, Ohio, Indiana, Illinois, Iowa, Nebraska, Kansas, and Missouri, grew a total of about 14,000,000 acres of corn. The average yield for this area for the past five years has been about 22 bushels per acre.

TYPEWRITERS Everyone Must Agree GIVEN AWAY

The Emerson Typewriter Company of Woodstock, Illinois, have recently given away over 100 of the highest grade, wholly visible Emerson typewriters made in the world. They have gone into every state and territory in the United States. There may be some in your town. They are giving them away every day to 15 men, women, boys and girls, over 15 years of age, on surprisingly liberal conditions. If you could make any use of a \$100 typewriter, providing it did not cost you even one cent, then in a letter of one page on a postal card addressed to Frank L. Wilder, President, Woodstock, Illinois, simply say, "Mail me all your free offers," and by return mail you will receive their Free Offers, the names of over 400 who have received typewriters free recently, and you will learn on what easy conditions you can get one of their typewriters free right away. The highest grade, wholly visible typewriters made in the world. Many who have used the "EMERSON" and other makes pronounce the "EMERSON" superior to any \$100 typewriter on the market. It is a wholly visible machine, has every new up-to-date feature, looks like other high grade \$100 typewriters, though it is selling just now at an astonishingly low price and on terms of no money with order, trial free in your own home. Nothing you could make any use of a \$100 typewriter for less than 10 cents a day until paid. The "EMERSON" has every new improvement, universal keyboard, back spacer, tabulator, two-color ribbon, everything the best; is the ideal machine for beginners as well as for the most expert typists and stenographers; just the typewriter for the smallest or largest office.

If you could possibly make any use of a high grade typewriter, even though it did not cost you one cent of money, or if you would like the agency of your town on a plan by which you could make big money, or if you would like a position with the company, then be sure, on a postal card or in a letter addressed to "Frank L. Wilder, President, Woodstock, Illinois," say, "Mail me your Free Offers."

Move on Now. Says a policeman to a street crowd, and whacks heads if it don't. "Move on now," says the big, harsh mineral pills to bowel congestion and suffering. Follow Dr. King's New Life Pills down, bulldoze the bowels. They gently persuade them to right action, and health follows. 25 cents at Barrington Pharmacy.

Electric Bitters

Succeed when everything else fails. In nervous prostration and female weaknesses they are the supreme remedy, as thousands have testified. FOR KIDNEY, LIVER AND STOMACH TROUBLE it is the best medicine ever sold over a druggist's counter.

that vitrified clay silos are practically weather-proof, storm-proof, fire-proof, acid proof, moisture-proof, require no tar coating, and are warranted not to crack as a result of silage pressure. These are some of the reasons why THE IMPERISHABLE SILOS are in demand. They are ideal and perfect, preserve the silage perfectly right up to the walls. When erected they are there to stay. They save the buyer money every year.
