

HALL'S OINTMENT

Willis—My sister has a burn on her left arm.
Willis—My sister has a burn without end.

CUTICURA OINTMENT HEALS BAD SORE ON LIMB

Some time ago I was coming up some steps when the board crushed under me like an egg shell, and my right limb went through the hole and scraped the flesh of the bone just inside and below the knee. I neglected it for a day or two, then it began to hurt me pretty badly. I put balsam for me to draw out the poison, but when I had used it a week, it hurt so badly that I changed to ointment. That made it smart and burn so badly that I couldn't use it any more, and that was the fourth week after I was hurt.

Then I began to use Cuticura Ointment for the sore. It stopped burning immediately and began healing right away. It was a bad-looking sore before Cuticura Ointment healed it, and I suffered so I couldn't sleep two days after I felt until I began using Cuticura Ointment.

Cuticura Soap is the best soap I ever saw. I have used all kinds of soap for washing my face, and always it would leave my face smarting. I had to keep a lotion to stop the smart, no matter how expensive a soap I used. I find at last in Cuticura Soap a soap that will clean my face and leave no smarting, and I do not have to use any lotion or anything else to ease it. I believe Cuticura Soap is the best soap made. (Signed) Mrs. M. E. Partridge, 805 Lafayette St., Wichita, Kan., May 8, 1911. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. L, Boston.

Strike Breakers of Old. Millis was being fed by the ravens. I don't care if the waiters do strike," he boasted.

Chloroform quickly relieves and cures burning, itching, swollen, and inflamed skin. Cures whooping cough, croup, and all other respiratory troubles. For free sample write to W. C. C. & Co., Chicago, Ill., U.S.A.

Women commiserate the brave, men the beautiful. The domination of pity has usually this extent, no wider—W. S. Lander.

Which will Gardner Tea always wins its merits as the best of herb teas. A long oration goes lame on the stretch.

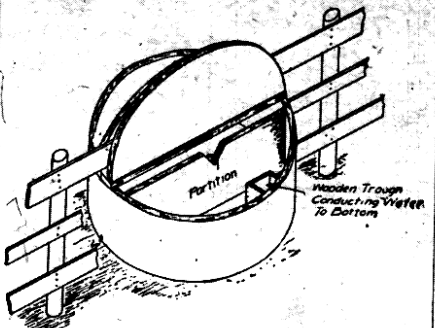

WIFE'S HEALTH RESTORED

Husband Declared Lydia E. Pinkham's Vegetable Compound Worth Restoring Her Health, And It Did.

Yakima, Ky.—Four years ago I seemed to have everything the matter with me. I had female weakness, irregular menstruation, and all sorts of troubles. I could hardly rest day or night. I doctored with all the best doctors in town and took many kinds of medicine but nothing did me any good. I saw an advertisement for Lydia E. Pinkham's Vegetable Compound. My husband said it was worth a try. I bought a box and took it. It did me just what I needed. I am now perfectly restored and can do all my usual work. I feel like a new woman. My husband says I am the best looking woman he ever saw. I am now perfectly restored and can do all my usual work. I feel like a new woman. My husband says I am the best looking woman he ever saw.

SOME CAUSES OF THE POOR QUALITY OF THE BUTTER THAT IS MADE IN ILLINOIS

This serves well for a cooling tank. It is the partition water-tight and let the notch carry off the overflow.

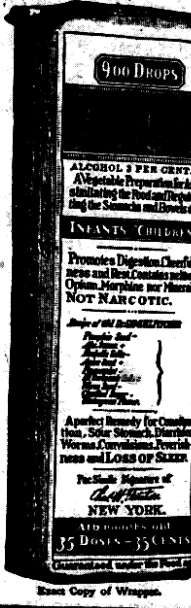

By N. W. HEPBURN, Associate in Dairy Manufacture, University of Illinois. During the past few years the attention of dairymen and manufacturers alike has been called in a striking manner to an increasing agitation from the public for a better butter quality. Ten years ago the fact that made Illinois butter was received at the creameries in the form of whole milk. That was before the day of the hand separator. With its advent a change took place and creameries began to use both hand separated cream and whole milk. At the present time practically two-thirds of the butter made in Illinois comes from farm skimmed cream. The whole difficulty in the quality seems to be in the use of the hand separator. This statement affects no discredit on the separator itself and it is useless to enumerate its good features; it has proved its value and has come to stay. While there is nothing inherently wrong in the hand separator which renders cream for manufacture into the best grade of whole milk butter, the various insanitary practices which are the natural outgrowth of the use of the separator have almost universally brought havoc to a field where the best grades of butter were formerly produced. Many methods for improvement have been suggested, among which are the grading of cream and paying for the raw material on the basis of quality. This has also been supplemented by agitation and vigorous complaint among the producers, pointing to better care of raw material. One great obstacle in improving the quality of butter is the fact that many creamery men who are producing inferior butter do not realize it. It is natural that a buttermaker, occupying one position for a period of years and seeing only the product of his own manufacture, should come to accept that butter as his standard for quality. Some of the serious obstacles in the way of those anxious to see an improvement in the quality of Illinois butter are now evident. It is clear that we must not seek quality through so-called improved systems of manufacture; the reform must begin back on the farm with more sanitary conditions for producing, handling and keeping milk and cream which is to be made into butter. The producer's methods, however, cannot be converted miraculously nor can the public be sold a bad article. Yet the public will have its way in the end and through its insistent demands we may eventually hope to secure improved farm conditions and better creamery practices, which will result in a superior grade of butter.

GROWING WOOL OF UNIFORM QUALITY

By W. C. COFFEY, Assistant Chief in Sheep Husbandry, University of Illinois. If the wool is to be fairly uniform in structure and length, the individuals in the flock must be similar in breeding. By using pure bred rams of the same breed for a series of years, the flock can be graded so that any type of wool will be sufficiently uniform in the particulars necessary, as structure, length, strength and cleanliness, to satisfy the demands of the market, providing proper attention is paid to the ewes reserved for breeding. The ewes should be shorn in fleece characteristics. In addition to other very necessary requirements aside from wool, they should carry lean ewes in quality, density and length. This is not so in absolute sense, for such is next to impossible. It is well known that the wool almost never as fine on the thighs as on the stomach and that it is rarely as long on the underlines as it is on the midside. The prevailing blood in the farm flocks of the middle-west, such as the English down blood breeds, such as Thropshire, Oxford and Hampshire. Any of these, under favorable conditions, produces wool which will meet with ready demand. So far as the wool product is concerned, the use of rams of different breeds is not only unnecessary but undesirable, as it lessens the uniformity. Unless the animal is properly fed the wool will not be strong and even in size. If the food supply is reduced to a point below the necessities of the animal's body, the wool fiber is reduced in diameter and a weak place in the result. This greatly reduces the commercial value of the wool. One of the reasons for this is that the wool which is produced in such farm flocks are kept in the process of coming, the fiber breaks at the weak place and the wool has to be put to some use of less value. It is therefore necessary for the owner to provide feed sufficient to keep his sheep well fed throughout the year. If the animal is in poor health, the effect on the growth of the wool is similar to that of insufficient feed. Sheep often used to dip their wool as a result of the poor condition. Any severe illness extending over sufficient time to reduce the animal in health will almost inevitably cause a weak place in the wool. The wool of a sheep which is kept in a good state of health and fed on a good ration of feed will be of a higher quality and will bring a higher price than that of a sheep which is kept in a poor state of health and fed on a poor ration of feed. Care should be taken to keep dirt and dung out of the wool; neither of these does much harm, but dirt, manure and litter, but they do damage, and they must be removed from the wool just as much as the hair. The sheep should be kept clean and free from dirt. Care should be taken to keep dirt and dung out of the wool; neither of these does much harm, but dirt, manure and litter, but they do damage, and they must be removed from the wool just as much as the hair. The sheep should be kept clean and free from dirt.

Physicians Recommend Castoria

CASTORIA has met with pronounced favor on the part of physicians, pharmacological societies and medical authorities. It is used by physicians with results most gratifying. The extended use of Castoria is unquestionably the result of three facts: First—The indisputable evidence that it is harmless. Second—That it not only allays stomach pains and quiets the nerves, but assimilates the food. Third—It is an agreeable and perfect substitute for Oyster Oil. It is absolutely safe. It does not contain any Opium, Morphine, or other narcotic and does not stupefy. It is unlike Soothing Syrup, Bismarck's Drops, Godfrey's Cordial, etc. This is a good deal for a Medical Journal to say. Our duty, however, is to expose danger and record the means of advancing health. The day for poisoning innocent children through greed or ignorance ought to end. To our knowledge, Castoria is a remedy which produces composure and health, by regulating the system—not by stupefying it—and our readers are entitled to the information.—Hall's Journal of Health.

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. E. H. Scott, of Chicago, Ill., writes: "I have prescribed your Castoria often for infants during my practice, and find it very satisfactory." Dr. William Belmont, of Cleveland, Ohio, says: "Your Castoria stands first in its class. In my thirty years of practice I can say I never have found anything so good as it." Dr. J. H. Tread, of Brooklyn, N. Y., says: "I have used your Castoria and found it an excellent remedy in my household and private practice for many years. The formula is excellent." Dr. R. J. Hamlen, of Detroit, Mich., says: "I prescribe your Castoria extensively, as I have never found anything to equal it for children's troubles. I am aware that there are imitations in the field, but I always see that my patients get Fletcher's." Dr. Wm. J. McCran, of Omaha, Neb., says: "As the father of thirteen children I certainly know something about your great medicine, and aside from my own family experience I have in my years of practice found Castoria a popular and efficient remedy in almost every home." Dr. J. R. Claxson, of Philadelphia, Pa., says: "The name that your Castoria has made for itself in the tens of thousands of homes blessed by the presence of children, scarcely needs to be supplemented by the endorsement of the medical profession, but I, for one, most heartily endorse it and believe it an excellent remedy."

GENUINE CASTORIA ALWAYS Bears the Signature of Chas. H. Fletcher The Kind You Have Always Bought In Use For Over 30 Years.

Easy to Lick Russia. A couple of little newbies stood in front of the Yonkerspost (O.) Telegram bulletin recently reading printed lines and making comments on the press reports. "Ose, it says here 'at there's liable to be some of trouble' 'til one on account of de treaty," said one. "What's de difference?" said the other. "De country don't need to worry."

FEARED AN OPERATION. Found a Wonderful Cure Without it. James Greenman, 143 East Adams St., Louis, Mich., says: "What I suffered with kidney trouble I can never express. It was nothing short of torture. In bed for three months with terrible pain in my back, an awful urinary weakness, dizziness, nervousness and depression. I rapidly lost 45 pounds. My doctor advised an operation but I would not submit. Gravel was forming and the urine had almost stopped. I began taking Doan's Kidney Pills and after using one box, I passed a stone half an inch long. I continued passing smaller stones until finally my doctor declared I recovered than was soon as well as ever."

"They say a man's wife often makes him, but Single's wife will never be able to put any pain in that man." "Just you wait until she gets a larva-cure in her hands."

Love of life. The woman who cares for a clean, wholesome mouth, and sweet breath, will find Doan's Kidney Pills a big benefit. At drug stores, 50c a box or sent postpaid on receipt of price by The Doan Medicine Co., Buffalo, N. Y.
