

BARRINGTON REVIEW

VOLUME 28, NUMBER 26

BARRINGTON, ILLINOIS, THURSDAY, OCTOBER 3, 1932

\$1.50 PER YEAR IN ADVANCE

NEWS ABOUT TOWN

Short Local and Personal Items—Brief Paragraphs About the Visitor and the Visited.

The Owl club dance takes place at the village hall tonight.

Ira Banks will move soon to the Lageschulte house on Cemetery street.

The Portia club will meet this evening at the home of Miss Rose Volker.

F. O. Stone this week installed his pool table which he has stored during the summer.

Misses Caroline and Emma Schaub of Chicago visited with their parents here last Sunday.

Mr. and Mrs. John Laney of Monmouth, Iowa, are visiting at the home of Miss Margaret Laney.

Mrs. Charles Nathan of Chicago visited with her parents Mr. and Mrs. Charles Baehner last week.

The board of village trustees will meet in session at the village hall next Monday evening.

John F. Gutz of Racine, Wisconsin, visited here Monday and Tuesday with his wife and children.

The floors and sidewalk at the village hall were resurfaced this week, the work being done by Harry Asker.

Mrs. Peter Hansen of Racine, Wisconsin, is visiting with her sister-in-law, Mrs. Peter Peterson of the Grace farm.

Mrs. C. L. Burns and children of Irving Park visited with Mrs. Burns' parents, Mr. and Mrs. George Banks, Sunday.

Mrs. Henry Pingel is quite ill and is confined to her bed. Her mother, Mrs. August Dietmann, of Danvers, is now caring for her.

Miss Agnes Throp returned to her home in Woodstock and Saturday a few days visit with Mrs. W. Spangner of Lake street.

"Pennie" Church is adding another vocation to his repertoire, being now an apprentice tailor at the shop of H. Banks and company.

Mrs. George Williams will entertain the Birthday club tomorrow at her home south of this village in honor of Mrs. Reuben Plagge.

F. E. Booth, Chicago optician, has resumed his professional visits to Barrington, and may be consulted at Barrington's jewelry store every Wednesday.

L. W. Broughton and Little son, Howell, of Birmingham, Alabama, visited here this week with Mr. Broughton's sister, Mrs. George Banks.

Miss Annie Lageschulte of North Hawley street gave a miscellaneous shower last Saturday evening for Miss Edna Baehner. Fourteen guests were present.

The board of highway commissioners of Barrington township met Monday morning in monthly session and the Chicago township commissioners met Tuesday.

W. H. Snyder, shop foreman in the signal department of the Chicago terminal of the C. & N. W. railway company, is spending a 10 days' vacation at his home here.

George Broughton and family of Wauconda were visitors at the Banks home here Sunday. Monday Mrs. Banks visited at Wauconda, returning Tuesday morning.

L. E. Hubbard, assistant to the manager of the local plant of the Bowman dairy company, went to Mokena Tuesday to work in the company's factory there for a few days.

Mr. and Mrs. Charles Thies went to Bristol, Wisconsin, in their automobile Sunday where they called on Mr. and Mrs. Robert Bennett. From there they drove to Milwaukee where they are spending the balance of the week.

Arnold Schaub, last week, sold one of his 16-horse power Barrington portable engine to Herman Arnold of Dundee. The fact that he was given a check in full as soon as the deal was closed, and before the engine was delivered, shows that the Barrington engine has the confidence of all who are acquainted with it.

Small flock of this village, which is supposed to be the LaSalle street depot of the Rock Island railroad, returned to work this week after a two week's vacation. Last week Mr. and Mrs. Frank visited at Chippewa Falls, Wisconsin, and Duluth, Minnesota, returning Tuesday.

Flames got your rent promptly and on time. Please get your rent promptly and on time.

G. W. Spangner was a Wauconda visitor Monday.

Mr. and Mrs. Carl Volker of Chicago spent Sunday with relatives here.

The rural mail carriers from the local postoffice now leave at 7:45 instead of seven o'clock as during the summer months.

McDonald Mrs. John Nelson and daughter Jeanette of Los Angeles, California, were visitors at the home of Lyman Powers the past week.

Arthur Connolly, who has been employed as butler at the G. E. Van Wagenen residence this summer, returned to Chicago for the winter last Tuesday.

Mr. and Mrs. A. M. Laney of Wauconda were here Sunday. Mr. Laney has the contract for constructing the water tank and outlet sewer system in this village.

Postmaster H. K. Brockway is planning to attend the sixth annual convention of the Illinois Association of Postmasters which will be held at Jacksonville next Tuesday and Wednesday.

A New England supper will be served in the parlors of the Methodist Episcopal church Friday evening October 11 from 5:30 to eight o'clock. Twenty-five cents a place will be charged.

Mrs. L. H. Bennett returned last evening from Belle Plaine, Iowa, where she has spent about five weeks with relatives. She was accompanied by her son, Mr. E. H. Dickey, who was visiting her indirectly.

There will be an Epworth league social in the parlors of the Methodist Episcopal church Tuesday evening, October 12. A good program is being prepared and the members of the league hope for a large attendance.

The pupils of the high school are planning a five-number entertainment course for the coming fall and winter. It will be remembered that the high school succeeded in bringing a three number course here last year and one with which the people who attended were well pleased with. Entertainments of this sort are the very best that can be given to any community. They are evenings of instruction and pleasure of which everyone should like to take advantage. Get ready. The pupils will probably ask you to buy tickets the latter part of this month and perhaps before that time.

The school law is one of the places of which the community as a whole has a right to be proud. It has been made so through the expenditures of the taxpayers money, through the care of school officials and last and greatest of all, the thoroughness and care of the school children who confine their play to the sidewalks and the playgrounds west of the building, that they may be kept in good condition. It seems that there is any person who is not interested in the beauty of this property, will they kindly, out of consideration for others, refrain from using the lawn as a public thoroughfare, in other words, friends, "keep off the grass."

The Barrington school has produced another prize winner. Mr. Faust, author of the system in penmanship in use here, visited the school Tuesday and awarded to Marion Plagge of the fourth grade, a silver medal for improvement in writing. This is the second time in three years that the Barrington school has been awarded a medal. The system of penmanship is the same as that taught in the business colleges in various parts of the country and there is no reason why pupils should not become proficient in penmanship except for lack of interest. Mr. Faust expressed himself as being very much pleased with the progress made last year. Parents encourage your children to make the coming year better than the last.

Birch
A girl was born last evening to Mr. and Mrs. Charles Tahlman of Main street.

Yesterday evening a girl was born to Mr. and Mrs. Andrew Grom of Columbia street.

Mr. and Mrs. Frank Donahue who live west of this village are the parents of a boy born yesterday morning.

Mr. and Mrs. Howard Castle announce the birth of a daughter, Saturday, September 28, at St. Herman hospital, Elgin.

Elgin Butter Market.
Butter was quoted at 30 cents on the Elgin board of trade Monday afternoon. This price is an advance of 11 cents over the quotation of a week ago.

Densen Here Saturday.
Governor Charles S. Densen and other Republican state candidates will be in this village Saturday afternoon to meet the voters and make short speeches.

Notice to Post Office Patrons.
The boxes in the post office are ruled and governed by the post office department at Washington, D. C., and they fix the rates of rent to be charged for use of the same. The rules instruct the postmasters to place the rent notice in the boxes ten days before the first of April, July, October and January, and if the renter of the box does not pay the rent before the first of the month the postmaster must put their mail in the general delivery and rent the box to others. All rents go to the government and are not to the postmaster.

ARRANGE FOR LECTURE COURSE

High School Pupils Plan a Five Number Entertainment Course for the Coming Fall and Winter.

The evening picnic given by the school band was held indoors because of the cold weather. The attendance was good, indicating that the people enjoy and appreciate the work of the boys. They hope to give you something better in the future.

The beginner's band will have its first rehearsal on Tuesday afternoon, October 5, after school. This band is composed of boys in school in the fourth grade or above. The work is in charge of Mr. Sears. Get an instrument for your boy and let him join; it will do him good.

The "Picture Man," Mr. Howell, made his biennial visit to the Barrington school this morning. Pictures of the first eleven grades, the base ball team and the band were taken before eleven o'clock. The twelfth grade pupils did not have theirs taken because of the absence of one of their members. Peter Peterson. Proofs of the work will be shown the latter part of the week.

The following pupils of room one were present absent on Tuesday during the month of September: Carl Ahrens, Elmer, Frey, Roger Graft, Joseph Pecos, Alvin Baehner, Esther Cooper, Gilda Hugand, Caroline Rohmeyer, Grace Seaton, Helen Winking, Henry Lindner, Kenneth Lewis, Robert Braadt, Ivan Lageschulte, Karl Weibelt, Minnie Hatch, Ethel Cooper, Glen Nacher, Laura Schank, Alice Smith, Arnold Danney.

WILLIAM SPRIGGS DEAD

Old Resident of Barrington Passed Away at His Chicago Home Last Week

William H. Spriggs died of Bright's disease last Thursday evening at his home at 434 State street, Chicago, and the remains were brought here Saturday afternoon and interred in Evergreen cemetery.

Mr. Spriggs was born at Peterborough North Hampshire, England, September 22, 1855, and came here with his parents when about 10 years of age. When a young man he went to work in the hardware business and was married there to Miss Mary Callahan who preceded him in death by about four months. From Woodstock they moved to Chicago where Mr. Spriggs was an engineer at the Palmer house for many years. When his father, who was still a resident of this village, was taken ill about two years ago he came here to care for him, and after his death remained at the home here with his sister, Mary. He returned to Chicago last spring when his wife was taken ill, and himself became sick shortly after her death, and remained in his Chicago home with his daughter Mrs. Mary Wendt, where he died.

The daughter and sister mentioned above are the only near relatives surviving.

The funeral was held Saturday morning at nine o'clock at his late residence and at 10 o'clock at St. Elizabeth's church, Chicago, where high mass was celebrated.

Denounce Fraud Cures
From thousands of pupils in all parts of the United States, take cures for consumption will be exposed and denounced as tuberculosis. They are not 25th. This is part of the program for the movement announced today by the National Association for the study and prevention of tuberculosis.

Three classes of cures are distinguished by the National Association. One is the use of the inhalant, the use of devices and drugs which can be bought for any sum ranging from ten cents to five dollars at a drug store. The second class of "cures" includes the "institutes," "sanatoriums," or "camps of "doctors," who for a considerable guarantee to cure consumption by some secret method of which they are the sole proprietors. There are nearly one hundred and fifty of these institutes in the United States, cheating the people out of millions of dollars annually.

In the third class "cures" are placed a number of home made remedies, which either through ignorance or superstition have been advanced as treatments for tuberculosis. Some of these are colons, lemons, rattlesnake poison, and dust, and the blood, dog's milk, "strippings," and even alcohol.

None of these remedies will cure consumption, declares the National Association. No drug, gas or other treatment, however, will cure consumption, which, when inhaled or injected into the system, will kill the germs of tuberculosis without doing serious injury to the body. The only real cure for tuberculosis recognized by the National Association consists of the combination of fresh air, good food, and rest taken under the direction of a competent physician.

Opportunity for a Bright Young Man
At the request of Congressman Frank Buchanan of the seventh Illinois district, Carl Schurz high school, will conduct a competitive examination for the appointment of a Midshipman to the Annapolis naval academy on October 11, at the above named school. The examination is open to any young man living in the seventh congressional district between 16 and 20 years of age. This is the second time that the congressman has given all the young men of the district an equal opportunity for the appointment to the government academy, rather than making personal appointments.

The requirements of the examination will be the same as the regular entrance examination to the academy, spelling, grammar, geography, U. S. History, world's history, arithmetic, algebra (through quadratics) and geometry (plane).

For information regarding the examination address W. F. Slocum, principal, Carl Schurz high school.

H. F. Schwaner of Lake's corner has rented a store building at Crystal Lake and opened a general merchandise store there this week.

E. H. Meyer re-opened the Wauconda mercery, one mile west of this village, Tuesday morning. The mercery had been closed for nearly a year.

TWO COUPLES ARE MARRIED

Ceremonies Were Performed by Rev. H. M. Thoren on Wednesday Evening

MADEIRA-BACHNER
Fred G. Hager, son of the late William Hager, and Miss Edna J. Baehner, elder daughter of Mr. and Mrs. Nicholas Baehner, were married last night at the home of the bride's parents at about eight o'clock in the presence of the immediate relatives. Rev. H. M. Thoren of Salem church performing the ceremony.

Mr. Hager is an employee of the Public Service Company of Northern Illinois and for nearly three years prior to his present work, was employed by the North Western Gas Light & Coke company.

Mr. and Mrs. Hager will reside at the home of Mr. and Mrs. Baehner. A blue luncheon was served after the ceremony was over. Both young people are esteemed by all who know them. They are industrious and have the good wishes of their friends and neighbors for a useful and prosperous life.

REYNARD HORTON
Fay K. Reynard and Miss Midge Marie Horton of Clearfield, Iowa, were married last evening at Salem parsonage by Rev. H. M. Thoren. Mr. Reynard is a prosperous farmer, and will abide by his occupation on his farm at Clearfield, Iowa. Miss Horton is the youngest daughter of Mr. and Mrs. J. W. Horton of that city and is a sister to Mrs. Benjamin Schroeder of this village, with whom the young couple will spend some time, during their honeymoon. Both Mr. and Mrs. Reynard are known to be popular in their community, and it is expected that when they return they will have a hearty welcome by their many friends.

Rock River Conference
The Rock river conference of the Methodist Episcopal church began its session in Evanston on Wednesday, October 2. This conference covers about one fourth of the territory of Illinois, being situated from the one directly south of it by an east and west line across the state. There is now a membership of about three hundred and fifty, including a few ministers who have retired from active work. The session will last a week and the concluding order will be Bishop M. Dowell. Only ministers are members of the body. The laymen, however, hold a session, usually on Friday, to discuss any question of interest that may come before them.

The usual plan of holding an annual conference is to devote the morning to business, the afternoon to evangelistic meetings and the evening to anniversaries.

The appointments for the coming year are fixed by the Bishop and his cabinet, composed of the district superintendents. The Rock river conference has the name of being a difficult conference to hold, but the presiding officer, being a resident bishop, will have all the problems well in hand. The appointments will probably be ready by next Tuesday.

From the present indications many changes in pastorate will take place and this fact will give rise to a feeling of some anxiety and uncertainty among both pastors and the churches they have served. It is very likely that the pastor of the Barrington church will remain as that seems to be the wish of the members.

No previous pastor has ever served the church more than five years. Rev. Mr. Ream was here for five years and Rev. Tuttle for four. According to the present arrangements, a pastor may remain as long as he and the church can agree as to the matter of his staying. If Mr. Mattison is returned, he will enter upon his sixth year of work here.

The church during his pastorate has increased in members and in financial strength and has year by year done excellent work in responding to the benevolent claims that make aggressive work in other fields possible.

The church is fortunate in having a fine company of loyal young people who are making their influence felt in every department of Christian activity. The Sunday school is well offored and is growing rapidly. The Epworth League, composed of young people, enters very largely into the life and work of the church and is a power for good. Other organizations in the church are doing their work and the outlook for the coming year is hopeful.

Recently there have come into the church from probation, on probation of faith and by letter, fourteen persons which makes the membership quite a little larger than it has been before for some years.

CHURCH NOTES.

ST. ANN'S
Services will be held next Sunday morning at 10:00 o'clock.

BAPTIST
Communion service the first Sunday morning of each month.

The monthly covenant meeting is observed the Wednesday evening preceding the Sunday communion.

Sunday morning preaching at 10:30 o'clock.

Sunday school at 11:40 a. m.

Evening praise and preaching service at 7:30 o'clock.

Devotional meeting will be held at the church, next Saturday evening at 7:30 o'clock and from now on, instead of Wednesday evening as heretofore.

The pastor will preach both morning and evening Sunday.

A new form of work is being inaugurated in the primary department of the Sunday school. Miss Catherine Ows will have charge and will be assisted by Misses Natalie Gillette, Florence Kilger and Dorothy Webster.

The plan being adopted is that, so successfully in use in the Hyde Park Baptist church of the University of Chicago. A series of 32 beautiful lessons in a course called "Beligion in Song and Story." Each scholar under the direction of his group teacher prepares, with furnished illustrative material, a page each Sunday, in a book of 32 pages which makes a volume or a year's work when completed and bound. The course extends over three years, completing itself when the three volumes are prepared. Each volume is beautifully colored and stitched.

These studies have been prepared by experts in child psychology and are by far the best method yet devised to make the child understand the great truths of religion and not violate or overstrain his thought life in a way the older methods have done. The book and book material for the year costs each child thirty cents unless the parents of some do not feel able to furnish the book to their child, in which case a book will be furnished gratis. It will be a permanent record of the child's religious growth and knowledge that the child may always preserve. The work will begin next Sunday.

SALOM
Sunday worship at 10:30 a. m. and 7:45 p. m.

Sunday school at 9:15 a. m. J. C. Plagge, superintendent.

K. L. C. C. meets at 7:00 p. m.; S. Gleske, president.

Prayer services Tuesday and Wednesday, 7:45 p. m.

Choir meets Friday evening.

General missionary meeting held first Wednesday each month at 1:30.

Woman's Missionary society meets first Thursday of each month, Mrs. B. H. Holt, president.

Mission band meets first Sunday of each month at 1:30.

Monthly offering of the church is taken on the second Sunday of each month.

Sunday school council meets first Wednesday evening of each month at 7:45.

The pastor will gladly respond to calls for service. Phone 115-M. Herman H. Thoren, Salem parsonage.

ZION
Sunday school next Sunday will commence at 9:30 and preaching services at 10:30.

The Frauenverein met in the church basement this afternoon.

Sunday, October 13, missionfest services will be held. In the forenoon Rev. Sieveking of Mokena will speak on home missions and in the afternoon Rev. H. H. Bierbaum of Des Plaines will speak on foreign missions. These services will be in German, and T. Bierbaum of Arlington Heights will speak in English.

METHODIST
No preaching services will be held in the Methodist Episcopal church next Sunday, October 6. The pastor, Rev. O.

THURSDAY, OCTOBER 3, 1912

The KITCHEN CABINET

SOME people are always grum-
bling because they have things
to be thankful that there are
things.

We need never hear more than one kind
of trouble at a time. Some people hear
three kinds all the time. Some people have
more, and all they expect to have
more.

Will be a brave man who first
did not an answer.

THE OYSTER SEASON.

Splendid Oysters.—Drain a quart
of oysters from their liquor and handle
each one to be sure there are no bits
of shell to cause discomfort, then dry
between the folds of a towel. Cut
pieces of bacon half the size of the
oysters and arrange the oysters and
bacon in alternate layers on wooden
skewers, being careful to place the
bacon under the oyster. Place in a
hot pan and bake until the bacon is
done. Serve a skewer on a slice of
toast to each person. The oyster
liquor may be heated and poured over
the toast just before serving.

Supreme Oysters.—Mix two table-
spoons of butter and fry until a
yellow color, two tablespoons of
minced onion, and four tablespoons of
flour and when well blended add a
cup each of cream, chicken stock
and oyster liquor. Season with salt, cay-
enne and nutmeg. Cook five minutes,
then add half a cup of finely cut chick-
en, the yolks of three eggs well beat-
en, when thick cool. Part of a pint
of oysters dry and cover each with
the chicken mixture, dip in egg and
crumbs and fry in hot fat. Serve on
a hot disk, garnish with lemon and
parsley.

Oyster Soup Amsterdam Style.—
Clean, pick over and chop one quart
of oysters, parboiled, dry and add to
the liquor enough water to make a
quart. Brown three table-spoonsful of
butter and add three and a half ta-
blespoonsful of flour. Pour on gradu-
ally, stirring constantly the oyster
liquor. Let simmer a half hour. Sea-
son with salt, paprika, celery salt, and
just before serving add a cup of
cream.

Oysters are valuable in the diet, as
they add to the flavors and variety and
are easily digested. As to nutrition,
there is not much in a pint of oys-
ters.

PIES GALORE.

The time draws near when the
mince meat for the time-honored day
of Thanksgiving must be prepared.
In each family the cherished recipe is
carefully read and materials gathered
and, strange to say, there is no mince
meat which tastes quite like that "that
mother used to make." Here are a few
which are handed down, and those
who have no cherished one, may per-
haps find one which sounds good:
Mix all the following ingredients to-
gether and cook sixty-two hours.
Three pounds of lean beef cooked and
finely chopped; two pounds of suet
chopped; three quarts of good fat ap-
ples finely chopped; the rind and seeds
of raisins, seeded; two pounds of cur-
rants, three pounds of citron cut in
pieces, half a cup each of candied lem-
on and orange peel chopped; a half
cup of lemon juice, the same of or-
ange juice, two table-spoonsful of salt,
four cups of brown sugar, one cup of
coffee (liquid), two cups of sweet
cream, a teaspoonful each of cloves and
allspice, two table-spoonsful of cinnamon
and a cup of jelly and three cups of
the liquor in which the meat was
cooked.

Mince Pie Meat.—Cook together four
pounds of lean beef and two pounds of
suet cooked; chop and take twice the
amount of chopped, Baldwin apples.
Add three chopped quinces, three
cups of brown sugar, two cups of
raisins, two quarts of cider, four
pounds of raisins, three pounds of cur-
rants, half a pound of citron finely
cut, a quart of stock in which the
meat was cooked, a table-spoonful each
of cinnamon, mace and cloves, two
grated nutmegs and salt to taste.
Cook all together two hours, except
the cider, which is added at the last.

Mince Pie.—Roll four milk
crackers, add one and a half cups of
sugar, a cup of molasses, a third of a
cup of lemon juice, one cup of raisins,
half a cup of butter and two well-
beaten eggs; salt to taste. Bake with
two crusts. This makes two pies.

Rebecca Maxwell

Cost Comparison.

The cost comparison of the world
has just about doubled every day since
the last century.

THE SETTING SUN

—From the Chicago Inter Ocean

WHY ROOSEVELT IS LOSING GROUND

Lifelong and loyal Republicans will not follow him out of the
Republican party.
The American people will not gratify the disappointed ambition
of a man who in a spirit of revenge, would wreck the Republican
party because it refused him a presidential nomination.
The country does not want for president a man who eagerly
grazes at every wild and radical theory merely to gain votes.
Honest men will not support a candidate who incited dishonest
contests to help his nomination and who accepts money for his cam-
paign from the Harvester and Steel trust directors.
Thousands of Republicans do not believe that men of unblemished
character who disagree with Roosevelt are thieves and liars.
Right-thinking people cannot treat a candidate who violates his
solemn pledges.
Republicans are beginning to realize that the only possible effect
of his candidacy may be the election of Wilson, and they are not
willing to bring upon the country the disaster of a Democratic ad-
ministration merely to gratify one man's hatred or ambition.
The people will not Mexicanize the United States by electing to
the presidency a man who declares that he has no objection to any
number of terms provided there is a recall. That is, it is again made
president he would expect to remain in that office until the people
drove him out. What Washington would not take what Grant could
not get Roosevelt shall not have.

CANVASS OF INDIANA

It Shows That the Roosevelt Move-
ment is Now on the
Decline.

Indianapolis, Ind. Sept. 30.—A care-
ful canvass has been made of the
Roosevelt sentiment in every county
in this state. The inquiry was started
by a prominent business man of
this city, who was anxious to learn
for himself the true condition of af-
fairs. He sent out a large number of
letters to men in each of the coun-
ties who were not politicians and
would have no incentive to falsify the
situation. The replies showed that in
every county in the state, with one
exception, there had been a marked
decrease in the Roosevelt sentiment.
The opinion was universally ex-
pressed that the Third Term candi-
date had fewer followers now in In-
diana than at any time since the cam-
paign opened and this number was
steadily decreasing. A few of these
reports summarized are as follows:

White county.—There is an agricul-
tural community and the farmers all
seem satisfied with conditions and
are not calling for a change. I see
no evidence of Bull Mooseism spread-
ing. On the contrary, it is weaker
than at first.
Stout county.—The Third Term
men are on the down grade and will
be so in a month later as they
are now.
Lake county.—Sentiment for the
Progressive party is weakening, espe-
cially among the farmers. Sentiment is
growing more and more favorable to
the administration.
Montgomery county.—The Bull
Moose sentiment here is waning. The
Third Term party is losing as the
campaign progresses.
De Kalb county.—There will not
be many Bull Moose voters here. Taft
will get some Democratic votes—
quite a number.
Miami county.—The changes are
now coming all our way. There are
no more conversions from the Repub-
lican ranks.
Tipton county.—The Bull
Moose sentiment is waning.
Revere.—From Allen and La Grange
counties are of the same effect.

SLIDING BACK IN NEVADA

Roosevelt Has Reached His Limit and
Is Rapidly Receding.

Reno, Nev. Sept. 25.—The decline
of the Roosevelt movement, notice-
able throughout the whole country, is very
apparent in Nevada.
"The interest in the Bull Moose
movement is crystallized in Roose-
velt," says the Evening Gazette, "and
that interest is waning." The Gazette
further states that Roosevelt's disap-
pointing speech in this state, the fact
that he is removing funds from
George W. Peck and is being sup-
ported only by cast-off politicians, are
dragstones about his neck. The Ga-
zette sums up the situation in Nevada
as follows:
"Roosevelt has reached the limit of
his power and is sliding back rapidly."

TYRANNY OF HER DAUGHTER-IN-LAW

"If you'll promise not to tell a soul, Charlotte," said Mrs. Darlington to her hostess, "I'll admit that I'm suffering from an overdose of daughter-in-law. A certain amount is a mental stimulus—too much simply stifles."

"Frances," my son Arthur's wife came to visit me just at the time all well regulated housekeepers think they have to go through the painful process known as housecleaning," she went on. "Now, don't breathe it to a soul, but I never clean house. I repeatedly try to keep things nice and comfortable, but my natural instinct is to avoid dirt. My attitude is that if it will leave me alone I will have it alone."

"What a little dust under the beds and in the closets!" I will never have my own commandment by telling you that, Frances does. She is perfectly fastidious about it. She is constant talking about germs and microbes. She is confessing all my shortcomings. I will admit that I don't believe in such clothes, anyway. There's far too much Frances does, though. Oh, dear, yes, she does."

"She simply can't sit down at a table happily unless the house has been thoroughly swept and pampered. I can do it without a tremor. I can leave dishes unwashed until every dish in the house has been used and not feel a quail. Frances has the dishes round up and washed on one side. After they have been used that she leaves you with a defrauded feeling, as though you had been done out of part of your meal."

"The morning after she came I saw her eyeing the living room curtains, which I must confess were not immaculate."

"Don't look at those curtains, Frances," I said, in my merry, light-hearted way. "I know they're not very clean, but I'm going to have the laundress wash and iron them Monday."

"Frances half opened her mouth, then shut it again. I wondered at the time why she didn't say whatever it was she had on her mind, but later in the day I found out."

"Mother," she said, tactfully—Frances is very tactful—that afternoon when we were sitting in the living room having what I considered a cozy little chat, "I've been wondering if it wouldn't be nice if we should get some curtain stretchers and stretch the curtains on them instead of having the laundress wash and iron them."

"To make a long story short, she dragged me downtown that very afternoon and we bought curtain stretchers. The next morning, with her own hands, she washed those curtains. Oh, there is no doubt that she is wonderful. I stand in the greatest awe of any one who can wash things clean, I never could. There's always much worse when I finish with them than when I began."

"After the curtains were arranged to suit her I happened to mention that I had some material which I intended to make into comforters when the spring moved. Again, speaking metaphorically, she felt upon that material teeth and nail. Then for days she and I struggled and perspired amid billows of cotton and woolen material until I finished with them than when I began."

"When one morning she accidentally opened the door of the chamber of horrors I thought she was going to faint. The chamber of horrors, by the way, is the room into which it is the time honored custom of the family to pitch everything that the family wishes to rid itself of. Personally, I get along very nicely by simply shutting my eyes, opening the door slightly and shying in the article. Then after the door is shut I have no further qualms. But Frances got quite white when she looked in. She made me feel—she did it tactfully—that no decent, self-respecting woman could exist in a house with a chamber of horrors. So together we pulled and hauled and worked and suffered and threw things away and had a perfectly horrible time generally, but we finally emerged in that pathetic and despicable condition called "as neat as a pin."

"It took us days to do it and we were both nearly dead when we got through. But the very next morning after we finished, if you can believe me, I found her with her head out of the window and the air of a bound that is just getting the scent. She was listening to a vacuum cleaner that was chugging across the street."

"Oh, mother," she said, "I'm going out to see if those men can't come to-morrow."

"Frances," I said, "you will do nothing of the kind. I positively refuse to be any cleaner than I am. From now to the end of your visit I intend to have my kind of a good time even if there isn't a floor swept or a dish washed."

"I did it," said Mrs. Darlington, gloatingly. "I kept Frances whirling in a perfect vortex of mattress and luncheon and afternoon teas and I had a beautiful time. But I related the day before she went away and let her close up the house for me."

"Frances is a dear girl," Mrs. Darlington declared finally, "but she certainly has a weird idea of having a good time!"—Chicago Daily News.

Poultry Diseases.

More diseases are contracted by poultry between June and September than during any other part of the year. In summer the birds are in the best of health and are in the best of health. Guard against this condition by giving them a little extra care.

Good Reason for His Action.

In Germany during a war a captain of cavalry was ordered out upon a foraging expedition. He marched to the district assigned to him. It was a lonely valley, but finding in the midst of it a small cottage, he knocked at the door. It was opened by an old man, who looked upon a staff. "You there," said the officer, "show me a field where I may set my troop to forage." The old man led them out of the valley and after a quarter of an hour's march they came to a fine field of barley. "Here is what we are in search of," exclaimed the captain. "Wait a few minutes," said the old man. "Follow me a little further." At the distance of a mile they arrived at another field of barley. The troop alighted, cut down the grain, tramped it and rode off. The officer then said to his conductor: "You have given yourself and us needless trouble, the first field was better than this." "Very true, sir," replied the good old man, "but it was not mine."

Sun and Fire Symbols.

There are two found occasionally upon the walls of old brick houses, at about the line of division between the first and second stories, flat pieces of iron five or six inches in length and shaped somewhat like the letter "S." The use of these articles was clearly brought from England, where it is still continued, and there is a curious origin and meaning attached to them. The figure in question is an early symbol of the sun. It is still used in Herefordshire and other parts of England. There one is informed that the reason for the particular form of these irons is that they were made thus in order to protect the house from fire as well as from collapse—Harper's Weekly.

Don't overlook our "Business not for sale" column. It's one of the most interesting.

Clothes.

He—"Did you ever observe what a difference clothes make on one's mind? Now, when I am in my riding togs, I'm all horse; when I have on my business suit, my mind's full of business; when I get into my evening dress my mind takes a purely social turn." She—"And I suppose that when you take a bath your mind's a utter blank?"—Stray Stories.

Megret Talks German.

In the large German colonies in Brazil there are many coal-black negroes who can talk nothing but German.

Whence the Term "Gazette."

The name "gazette" as applied to a newspaper is derived from a small Venetian coin, the price of the first news sheet published there.

Cut Shows Barrington Portable Gasoline Engine with Screen Water Cooling Tank

The Barrington Portable Gasoline Engine is mounted on heavy, substantial steel trucks. They are especially built and balanced for portable engine work and will stand perfectly stationary on a level floor without locking, when running at full speed and under load. The materials used in their manufacture are the best that money will buy. Equipped with friction clutch pulley, screw-scooping water tank with circulating pump, gasoline tank, speed lever, battery complete, magneto and all necessary accessories. The engine is fitted with a volume or throttling governor; this governor is a centrifugal high speed governor, being run two revolutions to one revolution of the engine, thereby maintaining a regulation that will govern on less than one hundredth part of an inch; and we guarantee the speed of this engine to be as regular as any steam engine ever built. Can be changed from 125 revolutions to 400 revolutions while running. Ask your neighbors about them.

This Engine Has Been On the Market for Nearly Ten Years and Over 200 Are In Use

The New Holland Grinder

The New Holland mill will do the work quickly and with less power than other grinders, preparing the grain so that the stock will get the most from the ration and you will get all the profit there is to be had from the grain you feed.

STYLE NO. 16 AND NUMBER 12 FEED MILL WITH ELEVATOR AND TWO-SPOUT RAINING ATTACHMENT

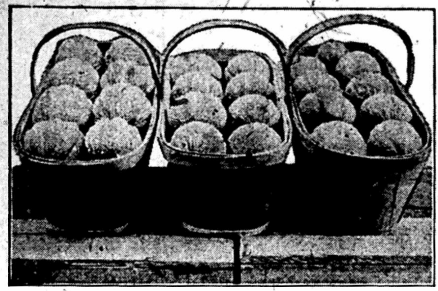

The Ohio Ensilage Cutter

The Ohio Ensilage Cutter with self feeder and blower is the best machine on the market for filling silos and is strongly recommended by many local users.

The farmer who buys the Ohio will make no mistake.

FERTILIZER EXPERIMENTS MADE WITH MUSKMELONS AT TWO ILLINOIS POINTS

By PROF. JOHN W. LLOYD,
College of Agriculture, University of Illinois.
(An abstract of Bulletin 155, Illinois Experiment Station.)

The Illinois agricultural experiment station has conducted fertilizer experiments with muskmelons at Anna, in Union county, and at Kinmundy, in Marion county, for five years. The chief objects of the experiments were to determine the relative efficiency of different amounts of manure and methods of application of manure; the effect of supplementing manure with commercial fertilizer in connection with manure and the effect of substituting commercial fertilizer for manure in the production of Gem melons. In both localities the experiments were conducted on typical melon soil of the region, that at Anna being unglaciated yellow silt loam, and that at Kinmundy gray silt loam.

At Anna the melons were started under glass and transplanted; at Kinmundy they were grown from seed planted directly in the field. In the field-planted crop there were marked differences in the vigor of the young plants plainly attributable to the differences in fertilizer treatment, and these differences were usually maintained until the harvest. The most uniformly vigorous plants were produced on plants manured in the hill. The yield records from the various plots in both the field-planted and the transplanted crop show plainly that under the conditions of these experiments manuring in the hill was far superior to broadcast manuring unless a very large amount of manure was used broadcast. The amount of manure used in the hills also had considerable influence on the crop, heavy applications being conducive to large yields of early melons. However, a relatively small amount of manure (one-eighth scoop-shovels per hill) applied to the hills produced very good crops, and its small cost made its use sometimes more profitable than the use of a larger amount of broadcast manure with the soil of the hill, although it increased the labor

of planting the crop, had no apparent advantage over applying the same amount of manure without mixing, except in the case of a large amount of manure applied to the transplanted crop.

Supplementing the manure in the hills with an application of manure broadcast resulted in the production of the highest average yield in the field-planted crop, but the expense for so much manure made the net profit less than from some of the other treatments. Likewise, supplementing the manure in the hills with the complete commercial fertilizer broadcast, increased the average yields but was so expensive that there was little profit derived from its use.

In the field-planted crop the addition of rock phosphate to the manure applied in the hills increased the average yield and the net profits.

Attempts to grow melons without manure were not very encouraging. When the complete commercial fertilizer was used in the hills in place of manure the yields were greatly reduced. This was especially true in the field-planted crop, where many plants were killed outright by the fertilizer and the maturing of the melons was greatly retarded on those that survived. Steamed bone applied to the hills gave fair results, but the yields were smaller than from the use of manure in the hills, and some years the plants were "burned" by the fertilizer, especially in the field-planted crop. The check plot, without manure or fertilizer, produced small yields, especially in the field-planted crop, where the melons also ripened very late.

The results of the experiments indicate that the influence of different methods of fertilizing the muskmelon are more marked upon a field-planted crop; but that the most satisfactory results in either crop are likely to be secured from the use of a moderate amount of well-rotted manure in the hills though, if desired, this manure may be supplemented with rock phosphate in the hills or with a complete broadcast or manure broadcast.

UNIVERSITY VIOLET AND HER DAUGHTER. FINE EXAMPLES OF SHORTHORN CATTLE

University Violet and Illinois Violet the Second.

The accompanying picture of University Violet and her daughter, Illinois Violet the Second, illustrates the kind of shorthorns that can be bred, as well as fed, with profit on the high priced land of the corn-belt. This is an important fact just at this time, when cheap feeder-cattle from cheap lands are beginning to be scarce, and the problem of raising his own feeders is forced upon the farmer of Illinois. If he is to raise cattle on his expensive corn-belt land, he can only afford to raise the best.

University Violet, the six-year-old cow shown, is that kind. Following are some of the reasons:

She is pure bred shorthorn (registration number 4709).

She comes from a long list of prize winners, being of the blood of Amos Goodrich's Violet, a daughter of the herself possesses the conformation and other characteristics of the prize winner, and is a very valuable animal.

She is able to transmit her good characteristics to her offspring. She has three daughters, the youngest of whom is shown in the picture, and all are very valuable animals. She shows what can be done by careful selection, and illustrates the possibility of securing lasting individuality.

University Violet is a daughter of Roseville Violet 5th by Scottish Chief, a straight Scotch bull, and was bred by Charles Goodrich by Roseville, out of Mary and out of the greatest breeding cow of her time in Scotland. At sixteen years of age Good-

IMPORTANT PINCH OF SALT

Seemingly There Are Few Dishes to Which It Will Not Impart an Excellent Flavor.

Few housewives, especially the little Mrs. Newlyweds, fully appreciate the value of the pinch of salt. Of course, everyone uses salt on meats, and in soups, entrees, vegetables, sauces, etc., but although the cook books do not always include it in recipes for cakes, pies and desserts generally, there is almost nothing from the most dainty gelatine and whipped cream dessert to bread and butter pudding that is not greatly improved by it. You probably would not dream of putting it in a pot of tea, but if you try it you will find that it brings out the aroma of the tea, making it actually fragrant by neutralizing the flatness of the water. This will be found especially so in localities where the water is hard or has a mineral taste. It should always be used in coffee and cocoa. It imparts a mellow taste to coffee and makes the cocoa seem very much richer.

The delicate flavoring of all custard desserts is imparted by the magic pinch of salt. Put it in pies of all kinds. Use plenty of salt in the pie crust where only lard is used for shortening. Meritages are improved by it.

At preserving time remember the pinch of salt, whether you are making preserves, jelly or marmalade. It simply puts the water where it belongs—in the background, and the fruit flavor stands out preeminent. These are a few of the out of ordinary, yet everyday, uses of a pinch of salt—Armour's Cook Book.

FOR PLUM OR GRAPE JELLY

Delicious Preserve Will Result if These Directions Are Faithfully Carried Out.

Put ripe plums in a colander and pour boiling water over them; then put the fruit in a preserving kettle with barely enough water to cover, and boil until the plums are softened and the juice is plentiful. Strain off the juice and put it on to boil. Measure out a pound of sugar to every pint of the juice, and place it in shallow pans in the oven to heat until the juice has boiled for twenty minutes. Add the sugar then, stirring it in until dissolved and removing all scum as it rises, and pour into glasses boiled in hot water to prevent their breaking when the scalding liquid is poured in. A delicious jelly from wild grapes may be made in the same way, but, remember, if the jelly bag is squeezed the result will be jam and not clear jelly. When the natural dripping seems about over, squeeze out all the pulp that will come through the mesh of the bag and use it for jam.

Peach Shortcake.

Sift one cup of flour, one teaspoon of sugar, two teaspoons of baking powder, and a teaspoon of salt. Mix for biscuit, dough two spoons of lard into the flour and with a spoon make a soft dough with a third (or little over) cup of milk. Pat out lightly on molding board and cut into six biscuits. Have some melted butter in a small pan and dip the top of each biscuit into this before turning over into the pan ready to bake. Bake until nicely browned in hot oven; then cook, break each apart and place sweetened peaches between. Peel and slice ripe peaches; rather dense, then crush with enough sugar to well sweeten. Serve with powdered sugar sprinkled over the tops; pass plenty of rich cream. (Level measures are used for the recipe.)

Preserved Half Peaches.

Clingstone peaches are the best. Pare and cut them in halves. Remove the stones and cook the stones in water for twenty minutes. Use the water for making syrup in which the peaches are to be cooked. For preserving, use as many pounds of sugar as there are pounds of fruit and one cupful of water to each pound of sugar. Boil the sugar and water until the syrup is clear, then add the peaches at a time, until they are cooked. Put into jars which have been sterilized and seal them while they are hot.

Mutton Pie.

Boil one and one-half pounds of mutton from the forequarter with sliced onions and carrots. Boil six or eight potatoes. Make a cupful of mashed potatoes. Slice rest of potatoes and put them into baking dish with the mutton and the other vegetables. Add to the mashed potatoes one tablespoon butter, one-half cup flour (or enough to roll mixture out for a crust) and a level teaspoon of baking powder. Put this mixture over meat and bake in a quick oven until crust is brown.

Rice Croquettes.

Boil for 20 minutes one cup of well-washed rice in a pint of milk. Whip into the hot rice the following ingredients: Two ounces of butter, the same of sugar, a little salt. When slightly cool add the yolks of two eggs, well beaten. If you stir power in a little more milk. When cold roll in small balls and dip into beaten eggs. Roll in fine bread or cracker crumbs and fry the same as doughnuts. Serve very hot.

Clean Utensils.

Breadboards and other kitchen utensils made of wood may be kept clean, white and sparkling by rubbing with soap and hot water, to which may be added a little common soda or household ammonia.

EXHAUSTION OF THE SOIL

Prof. E. H. Farrington of Wisconsin Agricultural College, in speaking of Soil Exhaustion, made a very interesting statement regarding the selling of dairy products from the farm as compared with selling the grain products directly off the farm. Here is what he says:

"There is a great difference in the amount of soil fertility removed from the farm by selling crops as compared with the selling of cream and butter. The constituents of the soil that become most nearly exhausted by farming operations are the nitrogen, the phosphoric acid and the potash. These each have a market value per pound and can be bought in commercial fertilizers. They are also contained in farm manure."

"An analysis of different crops and of milk, butter and cheese will show how much of these various constituents are removed from the farm when a certain quantity of these products are sold. For instance, by using the same price for the following crops, etc., we find that the fertilizing constituents taken from the soil when one ton of hay is sold from the farm have a value of \$1.34, one ton of corn \$2.34, one ton of wheat \$5.43, one ton of milk \$2.17, one ton of skim-milk \$2.31, one ton of butter 49 cents, one ton of whey \$4 cents, and one ton of cheese \$12.18. The value of each ton of these different products is well known. For instance, the ton of hay may be sold for \$20.00, while the ton of corn is worth \$60.00 and a ton of cheese \$200.00. These figures show, however, that if the crops raised on the farm are fed to the cows and either cream or butter only is sold, then the loss of fertility is but a small one. Fifty cents worth of fertility is drawn from the farm."

In encouraging the farmers to engage in dairying, Prof. Farrington says:

"Dairying keeps up the fertility of the soil as already explained. Skim-milk is very valuable to the farmer not only for the reasons given, but because it is profitable for a farmer to become a stock raiser—that is, raise calves, pigs, poultry, etc., rather than a crop producer and a seller of grain."

"Dairy products, butter and cheese, are not bulky to market, being much more concentrated and the cost of transportation less than it is for hay, grain, etc."

"Dairying utilizes waste land, such as stony pastures, timber and swamp land, which may be used for pasturing the cows if these are kept, but which otherwise would give no returns."

"Dairying gives profitable employment during the winter and idleness is not good for either man or beast."

A visit to the National Dairy Show at Chicago, October 24th to November 2nd next, will give every one a short course in dairying that cannot be equalled anywhere in the world, and all such matters as here discussed by Prof. Farrington will be illustrated by the world's experts in every branch of the dairy industry. Opportunities to view the best representatives on American dairies and to see the best of the dairy industry in a big, broad, educational way that all may be enabled to keep abreast of the most modern methods in appliances and the best results in breeding and feeding dairy cattle, and to see the best of the marketing of all dairy products. Adv.

Point for Sherlock Holmes.

Somebody wondered how long a certain woman who had just left the room had been married.

"About 15 years," said the jeweler.

"How do you know?" asked the jeweler's wife. "You never saw her until tonight."

"I can tell by the size of her wedding ring," he replied. "The width of wedding rings change about every five years. The kind she wears was in style 15 years ago."

Important to Mothers.

Examine a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher* in the *Children Cry for Fletcher's Castoria*.

A woman has no business with a family if she can't take something old and make it over into something new.

Mrs. Winslow's Soothing Syrup for Children Soothing the inflamed, red, swollen, itchy skin, always cures skin eczema, the itchy skin.

People who are crippled in the head get less sympathy than any other cripples.

CURES BURNS AND CUTS. Calumet Ointment cures burns, scalds, sunburns, cuts, scratches, etc. All druggists. C. W. Adams, 21 and 23c. Adv.

A smooth man is liable to be slippery.

The satisfying quality in LEWIS' Single Blade is found in no other razor. Adv.

One way to hold a man's interest is to take mortgages on his property.

W.L. DOUGLAS SHOES

\$3.00 \$3.50 \$4.00 \$4.50 AND \$5.00
FOR MEN AND WOMEN

Bears water W. L. Douglas \$2.25, \$2.50 & \$2.00 Substantial shoes with perfectly comfortable, soft, and durable soles, made of the best quality of leather, made on the men's shoes.

W.L. Douglas makes and sells more \$3.00, \$3.50 & \$4.00 shoes than any other manufacturer in the world.

THE STANDARD OF QUALITY FOR OVER 30 YEARS.

The workmanship which has made W. L. Douglas shoes famous the world over is maintained in every pair.

Ask your dealer to show you W. L. Douglas latest fashions for fall and winter wear, notice the short ramps which make the foot look smaller, points in a shoe particularly desired by young men. Also the conservative styles which have made W. L. Douglas shoes a household word everywhere.

If you could visit W. L. Douglas large factories at Brockton, Mass., and see for yourself how carefully W. L. Douglas shoes are made, you would then understand why they are so famous for their better, longer lasting shoes.

CAUTION—To protect you against inferior shoes, W. L. Douglas stamps his name on the bottom of each shoe. If the name is not there, the shoes are not W. L. Douglas shoes. No matter where you live, there are within your reach the shoes and shoe makers everywhere. No matter where you live, there are within your reach the shoes and shoe makers everywhere.
