

By Leslie F. Paddock

This is the day of the outdoor community meetings for prayer and song is now not. A neighboring church has been conducting its services in the winter, and fall, with the result that the church spirit of the town has been maintained. The church has been the one who have not been attending of any church have been drawn to the meet, though the services are not to be had in the church that creates in the accepted manner of Christian people.

The outdoor Christmas carol being played by local people every year has had to be given up for the sake of worship. Anyway, it will be a beautiful and fitting observance of the anniversary of the Saviour's birth and will add distinction to the community Christmas spirit.

— \* \* \* —

Barrington is fortunate in having a large number of good churches in proportion to its population than most towns. It also probably has a larger proportion of church-going citizens. This is reflected in the community spirit of contentment and well-being. But it also has a large number of other religious organizations. To these latter the following remarks are directed:

Sunday let us go to our good churches and let us go to our good churches—let us not be subscribers to any sect or creed.

Omitting all spiritual arguments from the start, let us not be of us to go to church with the sole of studying the church as an institution, and what it means to the individual and to society.

The church has existed for a good many centuries.

It would not have existed all this time without having some place in the scheme of nature and for humanity.

I think that the general attendance will be made of the individuals that are in the church and its members. And if this is true, why the church is in effect, in masking them so.

While it is true that all professions go to church, yet, the church has in time had its effect through their parents in giving their children a good education through the personal establishment of good order and prosperity, thereby insuring the welfare of the nation.

The church has, at all times stood for good morals, honesty and integrity.

All of these are the things that go to make liberty, order, prosperity and happiness.

Good morals are at all times good economy—all generally accepted moral principles are good economics at a time of peace.

It is true that all of us have not lived up to the standards of morality as advocated by the church, and we may, but we have had a restraining effect on us and has kept us in good health better than we would have been.

All persons who go to church are not right. Some use a church as a cloak for wrong-doing. But these are exceptions; few are seen found out, and set apart.

The great material function of the church, directly or indirectly, has been to restrain us from the pursuit of honest and useful labor. In our work; reduced our unprofitable expenditures, thereby promoted industry and thrift.

The way to make the church of more benefit to the community, and ourselves, as part of the community, is to become a part of the church—some church.

It is possible for any one of us to be part of the church in our home village or if we have a church in the woods. And this by remaining members of the church, and the rest of the institutions of the community that are for the common good.

These are the churches in the community for which we have a church for each of us, which we can accept, each according to his individual belief.

According to the Chicago Plan there were 76,831 crates of eggs and 17,778,639 pounds of ham in cold storage in the Chicago market in November, up against 50,805 crates of eggs and 16,939,325 pounds of butter at the same time last year. The price of both is steadily soaring.

To the casual observer it looks as though the price of eggs and ham in the cold storage is the same as in the cold storage. But that's not so. The Attorney General would have to tell the

BARRINGTON, ILLINOIS, THURSDAY, DECEMBER 4, 1919

\$2.00 PER YEAR IN ADVANCE

## CENSUS MAN WILL BEGIN WORK JAN. 2

Need 500 Enumerators for Third Census District

## WILL ASK MANY MORE QUESTIONS

Replied to Answer to Requests to Examine the Existing Inquiries to Be Put by Census Takers

Within a few weeks the work of taking the census will begin and Charles Stoffel of the Chicago census division will be here to direct the census for the third census district.

The census is the count of the community spirit of contentment and well-being.

But it also has a large number of other religious organizations. To these latter the following remarks are directed:

Sunday let us go to our good churches and let us go to our good churches—let us not be subscribers to any sect or creed.

Omitting all spiritual arguments from the start, let us not be of us to go to church with the sole of studying the church as an institution, and what it means to the individual and to society.

## SHORTEST CAUSES NO HARDSHIPS

Pensity of Hard Coal in Barrington to Supply Present Needs—One

Both local coal dealers have received hard coal this week, and one dealer has received a large quantity. All orders are being filled to the extent of one ton to a customer.

That is to say, in brief, that the coal situation in Barrington is good.

"No one is suffering because of lack of coal," said Mr. Stoffel. "Of course some are inconvenienced by the fact that they are only here, but we are in a helpful position to advise which will cleanse the coal of any dirt or debris, and the coal will be sent to a customer and expected to be able to combine furnished coal for the use of the customer."

The entire United States has been taken into account in the preparation of the census, and the whole of Lake County is included in the census.

The census is to be taken on November 1st, and the results will be available on December 1st. The census will begin on Dec. 1, 1920, and the work will begin on Jan. 2, 1920, and the work will be completed by the end of the year.

The census is to be taken on November 1st, and the results will be available on December 1st. The census will be completed by the end of the year.

The following is an answer to the question, "Is it known in ten years, but the census for the past has been taken?"

## FARM GRAIN SHOW IS CONTINUED

Tuesday Advisor Will Be Here Next Week—First Regular Visitor

About 20 exhibits of grain and small grain were entered at the grain show last Saturday, and only a few farms have entered since.

Mr. W. E. Watkins, of Lake County Farm Advisor, decided to postpone the grain show until next Tuesday, December 9th.

Mr. Watkins will be in Barrington on Dec. 9th to comment with local farmers on the grain market, and to speak at the grain show.

The grain show will be held at the grain market, and the grain will be sold at the grain market.

The grain market will be held at the grain market, and the grain will be sold at the grain market.

## COLD FACTS ABOUT BIDDY

Electric light eggs used to be considered a cold fact. But it isn't. It's a cold scientific fact.

Waking up a hen by turning on electric lights and keeping her on the job during the short winter day and part of the night is the trick.

White Leghorn Chicks at Hinsdale, Long Island, experimented along those lines. Not content, however, with the results he was getting, he sought advice from Professor J. E. Rice, of the Department of Poultry Farm Management at Cornell University.

Said the professor to poultry keepers whose hens are wasting time to many hours out of the 24 hours short days:

"The purpose of illumination is to give a 12- to 14-hour working day."

This means greater food consumption and greater activity on the part of the bird, with the result that eggs are laid earlier in the day than when prices are high.

"Some provision should be made to keep hens warm," Rice says. "For instance, lights may be used from dusk until 9 p.m., but the lights should be turned off the lights for 10 to 15 minutes, so that the birds will stop laying, then start again, according to the rooster."

"Fried chicken" rather than the whole corn.

"Painting the roofs of houses with white paint to make it possible to use smaller lamps and thus reduce the cost of illumination."

"In ordinary house with outside walls a rough rule is to lay one egg for each square foot of floor space. If you do not use illumination on breeding hens during the early winter, you will lose 10 percent."

"Of course this doesn't baffle will lay any more eggs in a year than otherwise—but she will then quit laying when eggs are cheaper."

Science can jolly a hen along only so far:

"Every truly," says Dr. Drake, "Director of Public Health,"

"Sputum Examination."

"Specimens of sputum from persons with tuberculosis or consumption will be examined without charge at the laboratory of the Illinois Department of Health, in counties under town commissioners, or at the county board of health (board of county commissioners) in counties not under town commissioners."

"The order of the board of health will be given to the physician, or to the physician within the limits of the municipality, when the order for the exclusion of unacculturated children should be issued from the office of health in counties under town commissioners."

"The order of the board of health will be given to the physician, or to the physician within the limits of the municipality, when the order for the exclusion of unacculturated children should be issued from the office of health in counties under town commissioners."

## Margaret's "Quackie" Rivals Mary's Little Lamb

SAN FRANCISCO.—Margaret Hinsdale, aged eight years, lives at 510 University street and has 5 ducklings. Whose name is more appropriate than Quackie? And now Quackie is a peculiarly affectionate and unusual duck, the result of a unique experiment.

He followed Margaret down to the grocery and butcher's shop and used to sit on the counter, and when she went to the hairdresser on Height street, "He accompanies her on all occasions," according to San Francisco papers. The ducklings were antipathetic to the girls, however, with Margaret and Quackie, but the girls had to be educated to like the ducklings, and the girls had to be educated to like the ducklings.

Margaret's mother, Mrs. John Hinsdale, quotes special: "Dad, that's the only time I ever had a duckling. I like it, but I don't know what to do with it."

The duckling came to fill the void left in Margaret's heart, and hence the name Quackie.

He follows Margaret to dress and undress like a doll. He goes with a soldier with a check list and a sword, and even as a lady, with all sorts of

the most feminine attire.

The following is an illuminating and clear statement from Dr. Drake regarding the much talked of vaccination question in Cook county:

## Your War Risk Insurance

All inquiries regarding War Risk Insurance will be answered by the Bureau. Address your questions to the Insurance Editor, Barrington Review.

What are the various forms of policies which the bureau offers?

(a) Ordinary Life Policy

On an ordinary life policy the premiums are payable during the life of the insured, or until his death.

At the time of his death the premium ceases.

(b) Twenty-payment Life Policy

On a twenty-payment life policy the premium is payable only during the first twenty years of the insured's life.

After the twenty years the insured becomes due and payable in installments.

(c) Thirty-payment Life Policy

On a thirty-payment life policy the premium is payable only during the first thirty years of the insured's life.

After the thirty years the insured becomes due and payable in installments.

(d) Twenty-year Endowment Policy

On a twenty-year endowment policy the premium is payable only during the first twenty years of the insured's life.

After the twenty years the insured becomes due and payable in installments.

(e) Thirty-year Endowment Policy

On a thirty-year endowment policy the premium is payable only during the first thirty years of the insured's life.

After the thirty years the insured becomes due and payable in installments.

(f) Endowment Policy Maturing at Age 62

On an endowment policy maturing at age 62, the premium is payable only during the first 62 years of the insured's life.

When the insured reaches 62 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(g) Endowment Policy Maturing at Age 65

On an endowment policy maturing at age 65, the premium is payable only during the first 65 years of the insured's life.

When the insured reaches 65 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(h) Endowment Policy Maturing at Age 68

On an endowment policy maturing at age 68, the premium is payable only during the first 68 years of the insured's life.

When the insured reaches 68 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(i) Endowment Policy Maturing at Age 71

On an endowment policy maturing at age 71, the premium is payable only during the first 71 years of the insured's life.

When the insured reaches 71 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(j) Endowment Policy Maturing at Age 74

On an endowment policy maturing at age 74, the premium is payable only during the first 74 years of the insured's life.

When the insured reaches 74 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(k) Endowment Policy Maturing at Age 77

On an endowment policy maturing at age 77, the premium is payable only during the first 77 years of the insured's life.

When the insured reaches 77 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(l) Endowment Policy Maturing at Age 80

On an endowment policy maturing at age 80, the premium is payable only during the first 80 years of the insured's life.

When the insured reaches 80 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(m) Endowment Policy Maturing at Age 83

On an endowment policy maturing at age 83, the premium is payable only during the first 83 years of the insured's life.

When the insured reaches 83 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(n) Endowment Policy Maturing at Age 86

On an endowment policy maturing at age 86, the premium is payable only during the first 86 years of the insured's life.

When the insured reaches 86 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(o) Endowment Policy Maturing at Age 89

On an endowment policy maturing at age 89, the premium is payable only during the first 89 years of the insured's life.

When the insured reaches 89 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(p) Endowment Policy Maturing at Age 92

On an endowment policy maturing at age 92, the premium is payable only during the first 92 years of the insured's life.

When the insured reaches 92 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(q) Endowment Policy Maturing at Age 95

On an endowment policy maturing at age 95, the premium is payable only during the first 95 years of the insured's life.

When the insured reaches 95 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(r) Endowment Policy Maturing at Age 98

On an endowment policy maturing at age 98, the premium is payable only during the first 98 years of the insured's life.

When the insured reaches 98 years of age, the amount due and payable is paid to him.

However, if the insured dies before the end of the thirty years, the premium will become due and payable in installments.

(s) Endowment Policy Maturing at Age 101
