## High Compression Performance that thrills the most Veteran Experts

By the Automobile Expert of "Automobile Topics"  
"It has... all the punch in the back every time the accelerator pedal is trod upon. Throughout the whole range, the response to throttle squeeze is so precisely the same, the sports are simply not to be found."

"It still will away from the traffic signal faster than anything Hudson has ever built. It will step out in lightning jumps to the head from any speed without the slightest hesitation."

But further, all this is accomplished without a vestige of that tin-kle-tinkle business under the hood that Englishmen know as "clinking" and American engineers as the gas knock, or detonation. Apparently this present Hudson engine has just been going to 'ginger' when the throttle is opened, the response is so precise, the sports are simply not to be found."

"Under precisely similar conditions most new motor-cars engine will detonate when running on ordinary fuel."

"It does on any old fuel at all, it is said, and assuredly does it on the run. It pump fuel that it sold at base prices everywhere."

There's no time out for Buick

The referee's whistle shrills... "time out"... The game halts, pending a player's return to the "line-up."

When you attend the big football games each year, notice the prominence of Buicks—for men and women who like action, like Buick. And hundreds of thousands of Buick owners can testify that there is no "time out" for Buick.
