

Earl Hatje Gives Report of Village Activity in Year

Outlines Problems Faced by Board and Solutions Reached

Village President Earl Hatje prepared a report on the past year's activities of the village board and presented this report to the trustees a week ago Monday. The report, outlining steps taken by the village board and the many tasks facing it, is published this week. Lack of news space prevented the report being published last week.

At the beginning of my term of office one year ago, the village of Barrington was faced with an injunction enjoining the use of its sewerage system and a contempt proceeding attempting to hold officers in contempt for failure to comply with said injunction, a mandamus to compel the levying of taxes to pay outstanding claims, and a threat of receivership, all the outgrowth of the failure of the village to solve its sewerage problem.

"A year ago there was unsettled the question of the handling of the sewage from the north portion of the village, particularly from the Jewel Tea subdivision which was being pumped into the plant. This sewage was being handled without any compensation ever having been given to the village by the Jewel Tea properties for the sewerage connection.

"The village also had suits pending in court for claims amounting to approximately \$35,000 brought by the Gjeljefeld Construction company, by the former engineer and former attorney for the village. The village also had pending suits when an attempt was made to hold the village liable for overvalued and forged bonds, and also when an attempt was made to establish liability of the village for special assessment funds diverted or tied up in the State bank. In addition to these items, the village was faced with a mass of obligations for a considerable time past due and in arrears, accrued because of a delay in collecting taxes and partly due to the unusual expense incurred by the village in connection with its financial and sewerage difficulties.

"It was a great satisfaction to me at the beginning of the year to have received the whole hearty support and cooperation of the members of the board in my desire to solve the most important, if not all of the problems facing the village before the expiration of my term of office. It is also with a great deal of satisfaction that I am able to report at the end of the year that much of the things which we set out to accomplish at the beginning of the year have been either fully accomplished or are well on the road to complete accomplishment. While it will not be possible to enumerate in detail the things accomplished during the past year, it will serve a useful purpose to mention a few of the things which have been accomplished during the past year and also to mention a number of the things which it should be the purpose of the board to accomplish during the ensuing year.

"Sewer System—Shortly after taking office and after the organization of the board, it was unanimously decided by the board that immediate steps be taken toward the solution of the sewerage difficulties. The board having, previous to my administration, employed on contracts attorneys and engineers whose ability and experience in this class of work was well recognized, we determined it was not to the best interest of the village to make any changes in the staff handling the sewerage problem. Immediate steps were taken by all

persons handling this project for the purpose of bringing the same to a conclusion with the result that during the month of July 1935, the request of the village of Barrington for a loan in the amount of \$24,481.00, and the approval of the village was approved, and the village was allotted a grant of \$24,481.00, and a loan of in excess of \$121,500.00. On the granting of this loan, much work faced the board of trustees, the village engineer, and the village attorneys in order to get this project in condition for awarding within the time limited by the public works administration. In addition to the preparations of complete plans, estimates and specification by the engineers, it was necessary to complete surveys for easements and to acquire rights of way for sewers in the village, and to acquire sewage rights to the Fox River. Properties were appraised and a condemnation suit or proceeding was filed for the recovery of rights from the Northwest highway to the Fox River. Engineering plans were completed and the work for advertising of bids. Two hearings were had on the condemnation suit, and the work for advertising of bids. Two hearings were had on the condemnation suit, and the work for advertising of bids.

"The work of the police department and also of the water superintendent has been at all times very satisfactory. I also desire to express my appreciation for the whole-hearted interest shown in the affairs of the village by the attorney for the village who has given liberally of his time and effort to solve the many problems submitted to him, and also for the work done by the engineers in connection with the sewer question."

Respectfully submitted, EARL HATJE, Village of Barrington

"Jewel Tea Subdivision Sewerage—The application of the village for a loan and grant was approved, the village immediately took steps to take care of settling the question with the Jewel Tea in connection with the village sewer and the elimination of the necessity of pumping the sewage. After considerable negotiations, the village was successful in making a sewerage agreement with the Jewel Tea company covering the connection charge, and the cost of pumping sewage from the Jewel Tea subdivision. By this negotiation, the village received the sum of over \$15,000.00 in connection with this matter.

"Litigation S settlements—With the progress of the sewer system and after the settlement with the Jewel Tea company, we then proceeded in an effort to settle outstanding litigations. The first effort was an aim to settle with Mr. Langworthy. A settlement was entered into between the village and approximately \$15,000.00, reducing the claim from \$5,000 to \$3,500. After considerable negotiations between the village and Mr. Gjeljefeld and his attorney, a settlement was finally agreed upon with the village for the sum of \$4,800.00. Later a settlement was made with Suh. Berryman, Peterson and Suh for services claimed to have been rendered to the village in connection with many different projects, all of which were referred prior to my connection with the village in 1931. This settlement was made for the sum of \$3,000.00. Thus, about \$14,000.00, the village settled pending suits for in excess of \$39,000.00.

"Outstanding Issue—In order to provide funds for the settlement of these lawsuits, by which settlements were made conservatively estimated at the village over the thousands of dollars, and for the purpose also of paying necessary obligations against the village, it was necessary to obtain funds by the issuance of bonds.

"WPA Project—In addition to the opportunity of obtaining necessary water system improvement and other necessary work by the use of WPA labor and funds. This work has been under the charge chiefly of Mr. Blanke, and a very satisfactory showing has been made.

"Paving—The village has provided for some paving out of its gas tax funds which was installed on Railroad Avenue, and village paving will be installed on Main street. Negotiations are also being carried on with the county board for the purpose of completing Main street throughout the entire length of the village.

"The passage of the ordinance proved to be an advantage to the residents of the village in so far as the elimination of annoying peddlers and solicitors is concerned.

"In conclusion, permit me to express my appreciation for the cooperation given by the members

of the board of trustees, and of the whole-hearted support and conscientious interest shown in their work by the village treasurer, Albert L. Wiedenbeck, and the village clerk, Arthur Barandi, the work of both of these men having been much increased.

"The work of the police department and also of the water superintendent has been at all times very satisfactory. I also desire to express my appreciation for the whole-hearted interest shown in the affairs of the village by the attorney for the village who has given liberally of his time and effort to solve the many problems submitted to him, and also for the work done by the engineers in connection with the sewer question."

Respectfully submitted, EARL HATJE, Village of Barrington

First U. S. Machine-Made Paper Delaware Product The great development of paper-making machinery and its introduction into the industry here dates back to the first quarter of the Nineteenth century. The first machine-made paper manufactured in the United States was made by Thomas Gilpin in 1817 on a cylinder machine in Hantsburg, Del.

The first Fourdrinier machine made in this country was made in 1830. In Europe machinery was utilized in the paper-making industry from about the year 1770. Rag paper, which was known to the Chinese before the Christian era, was introduced into Europe by the Saracens in the Eighth century, first through Spain, then France, Holland, Italy, Germany and England. The Saracens or Arabs are thought to have learned the art when they captured the Chinese city of Samarcand in 704, A. D.

There was little demand for paper at first in the American colonies, with few books printed, no newspapers for some time, and little personal correspondence. Parchment was still in use, while the paper that was required was imported from Europe. The first paper mill in this country was built in 1800 in Germantown, Pa.

Area of Ohio The area of Ohio, including her share of Lake Erie, is 44,863 square miles, whilst without this water surface the area is 41,263.

Cuba Township

Mr. and Mrs. John Wilson attended the funeral of the former's mother in Chicago Monday. Roland Pegg and son, Barton, of Chicago were Sunday visitors at the home of Mr. and Mrs. Albert Pegg. Mr. and Mrs. Lloyd Graham and Mr. and Mrs. Jack Wichman and families were Sunday guests of Mr. and Mrs. H. D. Kelsey. Mr. and Mrs. Joseph Wiemuth, Mrs. Leo Riley and Mrs. Whitehouse called on Leo Riley at the Hines hospital Friday.

Mr. and Mrs. Willard Kelsey and children were Saturday callers at the home of Mr. and Mrs. Frank Kelsey. Frank Kirby and daughter, Myrtle, called on Mr. and Mrs. Arnold Vogel of Dundee Monday evening. Mesdames Meyer, Pitts and Kelsey spent Thursday afternoon with Mrs. John Wilson. Mr. and Mrs. Frank Lageschulte visited with Mr. and Mrs. Charles Mavis of Algonquin Sunday. Mr. and Mrs. John Jansen and Mr. and Mrs. P. Christensen and families spent Sunday in Shady Hill. Evelyn Clinge is in the Sherman hospital where she is recovering from a mastoid operation. Mrs. Johan Jacobson of Shady Hill spent the past week with her children in Chicago.

Albert Pegg made a business trip to Chicago Monday. Mr. and Mrs. George Duke of Chicago called on Mrs. Leo Riley Sunday. Mrs. Bertha Ryan, Peter Anton, Wholis and Ballingers entertained Chicago friends Sunday. Mr. and Mrs. J. Fredrickson and baby of Chicago spent Sunday with the latter's parents, Mr. and Mrs. August Meyer of Shady Hill. Wendell marks the closing of Flint creek school with a family picnic on the school grounds. Kelsey school closes June 4 with its picnic at Lord's park, Elgin.

Miss Basely has accepted the school for the coming year.

Mr. and Mrs. Edward Ryan, Mr. and Mrs. Harry Ackersoph of Chicago, Mr. and Mrs. Arnold Vogel, Mrs. Fred Vogel of Dundee and Mr. and Mrs. Andrew Grom and children of Barrington were Saturday evening callers at the Kraus-Kirby home. Mrs. C. A. Piffner and Mrs. F. O. Keesee and children were Friday afternoon callers at the Kraus-Kirby home. Blanche and Stanley Muska entertained Chicago friends Sunday.

Obtaining Salt There are several principal means of obtaining salt. The simplest of these is by the evaporation of sea water. A more important method is to sink wells to the salt deposits, force water into them to dissolve the salt, then pump it out again. On reaching the surface the mixture is discharged into settling tanks where clay and other matter is allowed to settle, after which the brine is pumped into evaporating tanks from which the water is boiled off.

Public Service Co. Model Farm to Open to Visitors May 30

The Model Farm of the Public Service Co. of Northern Illinois, which is now open to the public, providing a place where people may see demonstrations of the latest electric equipment and lighting for farms and country homes, will be opened May 30, according to M. H. Schreiber, district superintendent of the company. "Much of the hard work of many of the tireless choppers farm life can now be done electrically, giving people who live in the country all the advantages and conveniences of city living," Mr. Schreiber. "Recognizing the need for a practical source of information on how to use electricity on the farm to the best advantage, we are opening Model Farm, meet that need."

"Model Farm is located on 16 acres of land about a mile north of Diamond Lake on route 69A. It will be managed by practical farmer who will demonstrate the latest electric devices and products of modern inventive genius that are beginning to change farm life throughout the nation. Visitors may see what happens to the farm kitchen, how it is transformed into a convenient work-saving room. They may see electrified dairy building, a new method of controlled electric ventilation for barns, the exhibition hall where the latest electrical farm appliances are shown and many new and interesting applications of electricity to 130 rural living.

"The farm is open on week-days from 10:30 A.M. to 5:00 P.M. on Saturdays and Sundays. In addition to the farm, there is a recreation lawn, a picnic grove, baseball diamond, ice courts, dance pavilion, refreshment stand, fully equipped swimming pool, and a convenient parking space. These facilities are available to groups for outings and picnicking."
