It may be of interest to recall that the bottom of the depression was hit by an extraordinary winter in March 1933 when the permits issued in the Chicago region amounted to only \$198,324. Two years followed in which the total receipts were half million dollars. But in March 1935 the total receipts were \$1,898,138 with monthly totals ranging from \$1,000,000 to nearly \$2,000,000.

This continued until the month of January and February of 1936. When the extremely cold weather made building practically impossible. With March 1936 a powerful warm gale blowing across and the figures began to rise. By the end of the year the total receipts amounted to \$1,898,138.

Building activity in Barrington for the year of 1936 climbed to the highest peak reached since 1931 with a volume more than 100 per cent greater than the total of either 1934 or 1935. The total for 1936 was \$1,898,138.
