**Vaccinate 100 Animals In Two
Days; Insects and Flies
Spread Disease**

Sleeping sickness, one of the most dread diseases for humans, strikes horses as well as men. Encephalomyelitis, sleeping sickness among horses, was discovered on three farms in this vicinity this week.

Those affected were horses belonging to Henry Krog and Clarence Tatz of Hanover township and Carl Dorwaldt of Barrington township.

Additional cases were said to be on a farm near Shoe Factory road and in the vicinity of Elgin. Symptoms are as follows: animal seems of feed, becomes sleepy and drowsy.

It has been common in Iowa, according to Dr. A. G. Gieske, local veterinarian but has just spread into this section. Flies and mosquitoes carry the infection, it is believed; the disease is not contagious.

Since discovery of it on the Krog farm Sunday and the Tatz and Dorwaldt farms Wednesday, Dr. Gieske has vaccinated more than 100 animals.

Vaccinating is the best means of prevention, he said. Other safety measures Dr. Gieske advocated were as follows: keep animal well-nourished, keep it in shade and away from flies and mosquitoes.

Full Time Man on Fire Department Is Recommended

**Chicago Underwriters Board
Reports on Recent
Inspection**

Recommendations for improved fire protection in Barrington, made by the Chicago board of underwriters included that of a full time paid man on the department with provisions for a substitute in case of his absence.

A report on the fire fighting facilities in the village was received here Monday by Earl Hatje, village president. It was based on a recent inspection made by the underwriters organization.

Four other recommendations were made. Three of them were relative to strengthening the water distributive system and the fourth was relative to revising the ordinances of the village governing storage of explosives and inflammable liquids. The chief criticism of the distributive system is that gate valves are too far apart. In one instance a valve near Cook and Station control the flow of water out of Grove avenue and two blocks of Hillside. In case this valve has to be closed because of a break in the main or for other reasons, it shuts off the water along this entire route.

The report commented favorably on most items of the village relative to fire protection.
