

Break Causes Stop Lights to Be Kept at Caution Signal

Due to a breakdown in the mechanism of the stop and go traffic control signs at the intersection of Main and Fourth streets have been operating on the caution signal for the past few days. The mechanism that controls the changing of the lights is not operating correctly. Chief of Police W. W. Wade reported, and while waiting an expert to repair the damage, the lights were changed to a red continuously on caution.

The lights bear a guarantee and if tampered with by any one not designated by the manufacturing company, the guarantee is voided.
