NO ONE deserves too much credit for inventing rayon, which is the recognized trade name in the United States for all synthetic fibers, formerly known as artificial or imitation silk, in the industry of the progress of manufactured goods.

The famous elements of the fiber are made from various substances of modified cellulose, such as wood pulp in a proper solution, which is pressed or drawn through orifices and solidified by means of a precipitating medium.

In 1869 Robert B. Owens, an English experimental physicist, published a book in which he described a microscopic examination of natural silk and suggested the possibility of producing a similar thread artificially.

Since then, the French scientists, and in particular, H. L. Leclercq, made a similar suggestion in 1871. Perhaps the first patent for the use of microfibers in the specific purpose of manufacturing imitation silk was that taken out in 1880 by Georges Audemars, of Lyons.

The rayon industry, however, did not really begin until 1888, when Comte Hilarie Chardonnet, of France, patented his method of producing the artificial silk by spinning the silkworm in the laboratory.

to keep an old car running.

You'll start when you want to start, stop when you want to stop. You'll have a car that's new, and fit, and sound; batteries, brakes, engine, tires—they'll all be at their best at the time you need them most!

Why not enjoy this winter for the change? This Buick, you know, is easy to buy—costs less than a year ago, less than you'd expect, less even than some steers.

And, we might add, it's easier to get deliveries now than it will be later when the rush is on. We hope we'll be seeing you—very, very soon!

General Motors' answer!

Even to Buick's slippery roads. You'll brace yourself for a rut or bump—only to discover that BuickCo springing has already ironed it out. You'll look out over the wide horizon—and know winter's beauties better through windows that feel you! In short, you'll have fun! All-winter fun! Fun unspoiled by the fusing and fretting it takes

Put it up against a fond pull-a-brick, stiff dash—a twisting, winding trail.

We want to show you, mister, how much fun winter could be, if only you had a Buick to make your going sure and carefree!

You'll press on the treadmill—and find the thrill of the skin run in the burst of rotary power from the barby whirling, great eight engine.

You'll swing around a curve—and find the poised sureness of the figure-skater in the way this Buick answers!

MAKE it stop on a clear, crisp day when the frost nips through the sunshine and there's a tingle in the air!

You'll swing around a curve—and find the poised sureness of the figure-skater in the way this Buick answers!

MAKE it stop on a clear, crisp day when the frost nips through the sunshine and there's a tingle in the air!

Put it up against a fond pull-a-brick, stiff dash—a twisting, winding trail.

We want to show you, mister, how much fun winter could be, if only you had a Buick to make your going sure and carefree!

You'll press on the treadmill—and find the thrill of the skin run in the burst of rotary power from the barby whirling, great eight engine.
